IBM zEnterprise EC12 Technical Guide Octavian Lascu,Ivan Dobos,Wolfgang Fries,Hua Bin Chu,Luiz Fadel,Martijn Raave,Fernando Nogal,Frank Packheiser,Vicente Ranieri,Ewerson Palacio,Andre Spahni,Chen Zhu,Parwez Hamid,IBM Redbooks,2015-03-04 The popularity of the Internet and the affordability of IT hardware and software have resulted in an explosion of applications architectures and platforms Workloads have changed Many applications including mission critical

ones are deployed on various platforms and the IBM System z design has adapted to this change. It takes into account a wide range of factors including compatibility and investment protection to match the IT requirements of an enterprise. This IBM Redbooks publication addresses the new IBM zEnterprise System. This system consists of the IBM zEnterprise EC12, zEC12, an updated IBM zEnterprise Unified Resource Manager, and the IBM zEnterprise BladeCenter Extension zBX Model 003. The zEC12 is designed with improved scalability, performance, security, resiliency, availability, and virtualization. The superscalar design allows the zEC12 to deliver a record level of capacity over the prior System z servers. It is powered by 120 of the world's most powerful microprocessors. These microprocessors run at 5.5 GHz and are capable of running more than 75,000 millions of instructions per second (MIPS). The zEC12 Model HA1 is estimated to provide up to 50% more total system capacity than the IBM zEnterprise 196 z196 Model M80. The zBX Model 003 infrastructure works with the zEC12 to enhance System z virtualization and management. It does so through an integrated hardware platform that spans mainframe, IBM POWER7, and IBM System x technologies. Through the Unified Resource Manager, the zEnterprise System is managed as a single pool of resources, integrating system and workload management across the environment. This book provides information about the zEnterprise System and its functions, features, and associated software support. Greater detail is offered in areas relevant to technical planning. It is intended for systems engineers, consultants, planners, and anyone who wants to understand the zEnterprise System functions and plan for their usage. It is not intended as an introduction to mainframes. Readers are expected to be generally familiar with existing IBM System z technology and terminology.

IBM QRadar Version 7.3 Planning and Installation Guide Elias Carabaguiaz, Fabian Alfaro, Francisco Villalobos, Jeffrey Arias, Kenneth Gonzalez, Warren Perez, IBM Redbooks, 2018-01-04. With the advances of technology and the reoccurrence of data leaks, cyber security is a bigger challenge than ever before. Cyber attacks evolve as quickly as the technology itself, and hackers are finding more innovative ways to break security controls to access confidential data and to interrupt services. Hackers reinvent themselves using new technology features as a tool to expose companies and individuals. Therefore, cyber security cannot be reactive but must go a step further by implementing proactive security controls that protect one of the most important assets of every organization: the company's information. This IBM Redbooks publication provides information about implementing IBM QRadar for Security Intelligence and Event Monitoring (SIEM) and protecting an organization's networks through a sophisticated technology which permits a proactive security posture. It is divided into the following major sections to facilitate the integration of QRadar with any network architecture:

- Chapter 2 Before the installation on page 3 provides a review of important requirements before the installation of the product.
- Chapter 3 Installing IBM QRadar V7.3 on page 57 provides step-by-step procedures to guide you through the installation process.
- Chapter 4 After the installation on page 77 helps you to configure additional features and perform checks after the product is installed.

QRadar is an IBM Security prime product that is designed to be integrated with corporate network devices to keep a real-time monitoring of security events.
