Louis I Kahn Towards The Zero Degree Of Concrete 1960 1974:

Louis I. Kahn Anna Rosellini, 2014 Through sheer determination and courage Kahn has researched the nature of concrete in the form of precast cast in place or blocks Each of his renowned works in exposed concrete such as the Yale Art Gallery the Richards Laboratories the Bath House the Salk Institute the National Assembly the Kimbell Museum the Exeter Library and the Yale Center for British Art is itself an important chapter in the history of architecture for the exploration into concrete s formal expression beyond the lesson of Le Corbusier Kahn s obsession on concrete fabrication processes on the formwork and the mix design is systematically examined in two volumes The authors illustrate Kahn s vision with documents that have never been revealed in other essays drawing heavily from original sketches plans specifications worksite photographs and correspondences with collaborators engineers technicians and contractors The first volume *Exposed Concrete and Hollow Stones* focuses on the first ten year period of Kahn research on concrete Moving through the many construction systems experienced by Kahn from the discovery of exposed concrete in the form of b ton brut at the Yale Art Gallery to the precast and poured in place techniques to the values of joint growth and ornament the essay culminates in the reconstruction of the artistic and technical characteristics of two great worksite the Richards Laboratories and the First Unitarian Church and School The second volume *Towards the Zero Degree of Concrete* covers the following fourteen years and leads the reader along Kahn s path to the true nature of concrete focusing on his main techniques and poetic discoveries such as the liquid stone of the Salk Institute the smooth finish at Bryn Mawr and the concept of monolithic at the Yale Center for British Art

Louis I. Kahn - Exposed concrete and hollow stones Roberto Gargiani, 2014-07-09 Through sheer determination and courage Kahn has researched the nature of concrete in the form of precast cast in place or blocks Each of his renowned works in exposed concrete such as the Yale Art Gallery the Richards Laboratories the Bath House the Salk Institute the National Assembly the Kimbell Museum the Exeter Library and the Yale Center for British Art is itself an important chapter in the history of architecture for the exploration into concrete s formal expression beyond the lesson of Le Corbusier Kahn s obsession on concrete fabrication processes on the formwork and the mix design is systematically examined in two volumes The authors illustrate Kahn s vision with documents that have never been revealed in other essays drawing heavily from original sketches plans specifications worksite photographs and correspondences with collaborators engineers technicians and contractors The first volume *Exposed Concrete and Hollow Stones* focuses on the first ten year period of Kahn s research on concrete Moving through the many construction systems experienced by Kahn from the discovery of exposed concrete in the form of b ton brut at the Yale Art Gallery to the precast and poured in place techniques to the values of joint growth and ornament the essay culminates in the reconstruction of the artistic and technical characteristics of two great worksite the Richards Laboratories and the First Unitarian Church and School The second volume *Towards the Zero Degree of Concrete* covers the following fourteen years and leads the reader along Kahn s path to

the true nature of concrete focusing on his main techniques and poetic discoveries such as the liquid stone of the Salk Institute the smooth finish at Bryn Mawr and the concept of monolithic at the Yale Center for British Art **Louis I. Kahn in Rome and Venice** Elisabetta Barizza,2021-07-22 This book examines the idea of organism in the work of Louis I Kahn from the turning point of Rome to the project for Venice It presents an original interpretation of the work of Kahn during one of the most fruitful periods of his career when he was working on a particular design method based on an entirely novel way of interacting with the past Beginning with a meticulous documentation and analysis of Kahn s experiences in the twenty years from 1930 to 1950 the book sheds new light on the relationship between Kahn s work and the modern movement The arguments are supported by case studies including that of the Palazzo dei Congressi in Venice based on Kahn s words like his lessons in Venice at IUA International University of Art in 1971 and others as the Trenton Bath House the Salk Institute La Jolla the Kimbell Museum Fort Worth the Yale Gallery and the Mellon Center for British Art New Haven and more Unlike much of the by now well established literature on Kahn s work Louis I Kahn in Rome and Venice suggests that the basic premise of Kahn s invention is the idea of spatial constructive organism which explains how he created forms that were inextricably anchored in the past without imitating any one kind of ancient architecture The main objective of the book is to explain Kahn s methodology to architects and students showing how he was able to design an architectural object with the characteristics of the best designed objects organisms in which each part contributes with the whole to creating something made of indivisible parts *Rome and the Legacy of Louis I. Kahn* Elisabetta Barizza,Marco Falsetti,2018-08-15 Louis I Kahn was one of the most influential architects thinkers and teachers of his time This book examines the important relationship between his work and the city of Rome whose ancient ruins inspired in him a new design methodology Structured into two main parts the first includes personal essays and contributions from the architect s children writers and other designers on the experience and impact of his work The second part takes a detailed look at Kahn s residency in Rome its effects on his thinking and how his influence spread throughout Italy It analyses themes directly linked to his architecture through interviews with teachers and designers such as Franco Purini Paolo Portoghesi Giorgio Ciucci Lucio Valerio Barbera and the architects of the Rome Group of Architects and City Planners GRAU Rome and the Legacy of Louis I Kahn expands the current discourse on this celebrated twentieth century architect ideal for students and researchers interested in Kahn s work architectural history theory and criticism *Studies in Construction History: the proceedings of the Second Construction History Society Conference* James Campbell,Karey Draper,Amy Boyington,Gabriel Byng,Amy DeDonato,Wendy Andrews,2015 The proceedings of second conference of the Construction History Society which took place on 20 and 21 March 2015 at Queens College Cambridge featuring 28 peer reviewed papers covering a wide variety of subjects on the theme of construction history *Drawing Imagining Building* Paul Emmons,2019-04-01 Drawing Imagining Building focuses on the history of hand drawing practices to capture some of the most crucial and overlooked parts of the process Using 80

black and white images to illustrate the examples it examines architectural drawing practices to elucidate the ways drawing advances the architect's imagination Emmons considers drawing practices in the Renaissance and up to the first half of the twentieth century Combining systematic analysis across time with historical explication presents the development of hand drawing while also grounding early modern practices in their historical milieu Each of the illustrated chapters considers formative aspects of architectural drawing practice such as upright elevations flowing lines and occult lines and drawing scales to identify their roots in an embodied approach to show how hand drawing contributes to the architect's productive imagination By documenting some of the ways of thinking through practices of architectural handdrawing it describes how practices can enrich the ethical imagination of the architect This book would be beneficial for academics practitioners and students of architecture particularly those who are interested in the history and significance of hand drawing and technical drawing

The Architecture of Ruins Jonathan Hill, 2019-03-25 The Architecture of Ruins Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin's incomplete and broken forms expand architecture's allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change

Metamorphism Ákos Moravánszky, 2017-11-20 Materiality is a recurring and central issue in architecture This

book explains how materials are constructed how they become cultural substances Metamorphism investigates the complex relationship between natural materials and technology science and sensuality Gottfried Semper 1803 1879 made the notion of Stoffwechsel the key element of his theory With this concept he intended to explain how a structural form originally bound to a method of processing is transferred from one material to another liberated from its original function For the first time the book investigates the subject from a historic point of view whilst reflecting on current interdisciplinary research

Examples from Aalto to Zumthor illustrate the specific aspects of historic and contemporary material concepts **Miracles in Concrete** Estonian Museum of Architecture,2022-08-01 The first comprehensive tribute to Louis Kahn s and Moshe Safdie s structural engineer The Estonian American civil engineer August Komendant 1906 1992 worked with numerous famous architects and engineers on several of the 20th century s most iconic buildings Concrete was Komendant s passion through decades He used his expertise in designing structures as different as the Kadriorg Stadium grandstand in Tallinn Estonia Elmar Lohk 1938 the Habitat 67 experimental housing complex in Montr al Canada Moshe Safdie 1967 and the Kimbell Art Museum in Fort Worth Texas USA Louis I Kahn 1972 Komendant combined technical expertise with a keen sense of aesthetics as an engineer he valued the timeless and enduring qualities of architecture He knew that miracles require more than spreadsheets and a budget the creative impulse is essential One of the most innovative civil engineers of the 20th century Specialized in the use of reinforced concrete and various other concrete technologies Structural engineer to architects such as Louis I Kahn Moshe Safdie and Eero Saarinen
