Resources in Education ,1996 **Using Shakespeare's Plays to Explore Education Policy Today** Sophie Ward,2016-10-26 Shakespeare is revered as the greatest writer in the English language yet education reform in the English

speaking world is informed primarily by the market order rather than the kind of humanism we might associate with Shakespeare. By considering Shakespeare's dramatisation of the principles that inform neoliberalism, this book makes an important contribution to the debate on the moral failure of the market mechanism in schools and higher education systems that have adopted neoliberal policy. The utility of Shakespeare's plays as a means to explore our present socio-economic system has long been acknowledged. As a Renaissance playwright located at the junction between feudalism and capitalism, Shakespeare was uniquely positioned to reflect upon the nascent market order. As a result, this book utilises six of his plays to assess the impact of neoliberalism on education. Drawing from examples of education policy from the UK and North America, it demonstrates that the alleged innovation of the market order is premised upon ideas that are rejected by Shakespeare and it advocates Shakespeare's humanism as a corrective to the failings of neoliberal education policy. Using Shakespeare's *Plays to Explore Education Policy Today* will be of key interest to researchers, academics and students in the fields of education, policy and politics, educational reform, social and economic theory, English literature and Shakespeare.

21st Century Nanoscience Klaus D. Sattler, 2022-01-18. This 21st Century Nanoscience Handbook will be the most comprehensive up-to-date large reference work for the field of nanoscience. Handbook of Nanophysics, by the same editor, published in the fall of 2010, was embraced as the first comprehensive reference to consider both fundamental and applied aspects of nanophysics. This follow-up project has been conceived as a necessary expansion and full update that considers the significant advances made in the field since 2010. It goes well beyond the physics as warranted by recent developments in the field.
