Digimodernism Alan Kirby, 2009-05-01. Almost without anybody noticing, a new cultural paradigm has come center stage, displacing an exhausted and increasingly marginalised postmodernism. Dr Alan Kirby calls this cultural paradigm digimodernism, a name comprising both its central technical mode and its privileging of the fingers and thumbs in its use. The increasing irrelevancy of postmodernism requires a new theory to underpin our current digital culture.

Supplanting the Postmodern David Rudrum, Nicholas Stavris, 2015-09-24. For more than a decade now, a steadily growing chorus of voices has announced that the postmodern literature, art, thought, and culture of the late 20th century have come to an end. At the same time as this, the early years of the 21st century have seen a stream of critical formulations proclaiming a successor to postmodernism. Intriguing and exciting new terms such as remodernism, performatism, hypermodernism, automodernism, renewalism, altermodernism, digimodernism, and metamodernism have been coined, proposed, and debated as terms for what comes after the postmodern. *Supplanting the Postmodern* is the first anthology to collect the key writings in these debates in one place. The book is divided into two parts: the first, *The Sense of an Ending*, presents a range of positions in the debate around the demise of the postmodern; the second, *Coming to Terms with the New*, presents representative writings from the new isms mentioned above. Each of the entries is prefaced by a brief introduction.

by the editors in which they outline its central ideas point out the similarities and or differences from other positions found in the anthology and suggest possible strengths and limitations to the insights presented in each piece
