Guide To Modern Econometrics Verbeek 201:

A Guide to Modern Econometrics Marno Verbeek, 2017-07-31 A Guide to Modern Econometrics 5th Edition has become established as a highly successful textbook. It serves as a guide to alternative techniques in econometrics with an emphasis on intuition and the practical implementation of these approaches. This fifth edition builds upon the success of its predecessors. The text has been carefully checked and updated taking into account recent developments and insights. It includes new material on causal inference, the use and limitation of p values, instrumental variables estimation and its implementation, regression discontinuity design, standardized coefficients and the presentation of estimation results. **A**

Guide to Modern Econometrics Marno Verbeek, 2008-05-27 This revised and updated edition of A Guide to Modern Econometrics continues to explore a wide range of topics in modern econometrics by focusing on what is important for doing and understanding empirical work. It serves as a guide to alternative techniques with the emphasis on the intuition behind the approaches and their practical relevance. New material includes Monte Carlo studies, weak instruments, nonstationary panels, count data, duration models and the estimation of treatment effects. Features of this book include: Coverage of a wide range of topics including time series analysis, cointegration, limited dependent variables, panel data analysis and the generalized method of moments. Empirical examples drawn from a wide variety of fields including labour, economics, finance, international economics, environmental economics and macroeconomics. End of chapter exercises review key concepts in light of empirical examples.

The Oxford Handbook of Panel Data Badi Hani Baltagi, 2015 The Oxford Handbook of Panel Data examines new developments in the theory and applications of panel data. It includes basic topics like non-stationary panels, co-integration in panels, multifactor panel models, panel unit roots, measurement error in panels, incidental parameters and dynamic panels, spatial panels, nonparametric panel data, random coefficients, treatment effects, sample selection, count panel data, limited dependent variable panel models, unbalanced panel models with interactive effects and influential observations in panel data. Contributors to the Handbook explore applications of panel data to a wide range of topics in economics including health, labor, marketing, trade, productivity and macro applications in panels. This Handbook is an informative and comprehensive guide for both those who are relatively new to the field and for those wishing to extend their knowledge to the frontier. It is a trusted and definitive source on panel data having been edited by Professor Badi Baltagi, widely recognized as one of the foremost econometricians in the area of panel data econometrics. Professor Baltagi has successfully recruited an all-star cast of experts for each of the well-chosen topics in the Handbook.
