

Chapter 9 – Food and Agriculture AP Human Geography – Reading Guide **ANSWERS**

Key Issue 1 – Where Did Agriculture Originate?
Rubenstein 12e, Pgs. 308-311

1. Define agriculture: deliberate modification of earth's surface through cultivation of plants and rearing of animals to obtain sustenance or economic gain
2. Define cultivate: "to care for" usually a crop or a farm animal
3. Define the agricultural revolution: a time when humans first domesticated plants and animals and no longer relied entirely on hunting and gathering
4. When did the agricultural revolution occur? How can scientists be certain about that date?
Around 6000 BC because that's when the world's population began to grow at a more rapid rate - indicating that humans had larger and more stable sources of food and more people survived
5. Explain the factors that contributed to the agricultural revolution:
 - Environmental factors - climate change caused a redistribution of humans, animals and plants as the earth moved out of the ice age
 - Cultural factors - preference for living in a fixed location rather than nomads would have encouraged people to learn how to farm and begin permanent settlements
6. Label the crops and animals that were first domesticated in each of the regions of the map:

strain rate dependent component based connection modelling for use - Sep 27 2022

web oct 1 2013 this paper introduces the use of rate dependent springs to component based joint models this allows strain rate hardening as well as strain rate induced reductions in ductility to be included in component spring models for

material data definition massachusetts institute of technology - Apr 03 2023

web abaqus cae usage property module material editor name use the menu bar under the material options list to add behaviors to a material large strain considerations when giving material properties for finite strain calculations stress means

true cauchy stress force per current area and strain means logarithmic strain

defining rate dependent yield with yield stress ratios - Mar 02 2023

web abaqus allows you to define a material s yield behavior accurately when the yield strength depends on the rate of straining and the anticipated strain rates are significant you can define strain rate dependence in two ways enter hardening curves at different strain rates directly as described in the following sections

modelling time dependent behavior of buried polyethylene pipes using abaqus - Aug 27 2022

web constant strain rates ranging from 10^{-5} s to 10^{-1} s these strain rate dependent stress strain relations are used in the input file and were simulated using fe modelling using abaqus same size of the specimen i e 12.7 mm diameter and 25.4m height is modelled in the fe analysis figure 1 shows the fe mesh developed both
