

## 4.10 Strategic Management

backward in the chain and enters specific production process steps with the intention of making them into new businesses for the firm.

Backward integration is a step towards division of effective steps by entering business of input providers. Strategy employed to expand profits and gain greater control over production of a product whereby a company will acquire or build a business that will increase its own supply capability or provide full of production. On the other hand forward integration is moving forward in the value chain and entering business lines that use existing products. Vertical integration will also take place where organisations enter into businesses of distribution channels.

- (b) Concentric diversification amounts to related diversification. In the form of diversification, the new business is linked to the existing businesses through existing systems such as process, technology or marketing. The new product is a spin-off from the existing facilities and production processes. There are benefits of synergy with the current operations. However, concentric diversification differs from vertically integrated diversification in the nature of the linkage the new product has with the existing ones.

While in vertically integrated diversification, the new product falls within the firm's current process-product chain, in concentric diversification there is a departure from the vertical linkage. The new product is only connected in a close-link manner at one or more points in the firm's existing process/technology/product chain. In concentric diversification there are benefits of synergy with the current operations.

- (c) When an organization adopts a strategy which requires taking up those activities which are unrelated to the existing businesses, either in terms of their respective customer groups, customer functions or alternative technologies, it is called conglomerate diversification. Conglomerate diversification has no common thread at all with the firm's present position. For example, the businesses of Godrej are diversified into furniture, soaps, oils, insecticides and so on.
- (d) Turnaround is needed when an enterprise's performance deteriorates to a point that it needs a radical change of direction in strategy, and possibly in structure and culture as
