Current Index to Journals in Education, Semi-Annual Cumulation, July-December, 1976, 1976-10 Current Index to Journals in Education, 2000-04 Probability and Statistical Physics in Two and More Dimensions Clay Mathematics Institute. Summer School, 2012 This volume is a collection of lecture notes for six of the ten courses given in Buzios Brazil by prominent probabilists at the 2010 Clay Mathematics Institute Summer School Probability and Statistical Physics in Two and More Dimensions and at the XIV Brazilian School of Probability In the past ten to fifteen years various areas of probability theory related to statistical physics disordered systems and combinatorics have undergone intensive development A number of these developments deal with two dimensional random structures at their critical points and provide new tools and ways of coping with at least some of the limitations of Conformal Field Theory that had been so successfully developed in the theoretical physics community to understand phase transitions of two dimensional systems Included in this selection are detailed accounts of all three foundational courses presented at the Clay school Schramm Loewner Evolution and other Conformally Invariant Objects Noise Sensitivity and Percolation Scaling Limits of Random Trees and Planar Maps together with contributions on Fractal and Multifractal properties of SLE and Conformal Invariance of Lattice Models Finally the volume concludes with extended articles based on the courses on Random Polymers and Self Avoiding Walks given at the Brazilian School of Probability during the final week of the school Together these notes provide a panoramic state of the art view of probability theory areas related to statistical physics disordered systems and combinatorics Like the lectures themselves they are oriented towards advanced students and postdocs but experts should also find much of interest OAR Quarterly Index of Current Research Results United States. continue to attract the interest of researchers after more than half a century since the seminal work of Ulam and Von Neumann The ACRI series of conferences has the ambition of being an internationally renowned forum for all those interested in the theory and applications of cellular systems The contributions collected in this volume concern cellular automata in various fields such as theory implementations and applications In addition several fields of research e.g. the multi agents approach adopt methodologies that show similarities to cellular automata but without the label Cellular Automata Therefore one of our intentions was to enlarge the cellular automata community to include new related techniques
