Finances publiques et performance des entreprises International Institute of Public Finance. Congress, 1989 The topic of the 43rd Congress of the International Institute of Public Finance was Public Finance and the Performance of Enterprises The title reflected profound changes in the thinking and approaches of economists traced back to economic developments such as the worldwide slowing down of economic growth dwindling of productivity increases growing unemployment and rampant increase in public debt experienced during the 1970s and 80s The Congress was not primarily concerned therefore with the economic efficiency of

particular enterprises but with the interface of Public Finance and the behavior of enterprises The intent was to detect how fiscal policy decisions effect the behavior of enterprises and how this in turn influences the overall performance of an economy to seek microeconomic foundations for macroeconomic relationships This volume presents the proceedings of the 43rd Congress with papers from numerous international contributors

governments can no longer bail out sub federal obligations for more than 3% deficit to GNP annually and 60% debt to GDP the volume edited by B Dafflon is important and highly welcome Insofar it represents an interesting and important milestone in the evaluation of the success of local budget rules in European countries C A Schaltegger Kyklos Most countries apply some form of restrictions to local government budgeting and borrowing but in various forms and to varying degrees These restrictions are considered necessary components of a fiscal federalism involving some sort of central government control in local affairs a design which can be termed administrative federalism In this comprehensive book Bernard Dafflon introduces the reader to the institutional complexities of fiscal controls in European local public finance The authors comprehensively explore the issues of government budgeting and borrowing with the ultimate aim of understanding how mechanisms of fiscal discipline are established and function Ten European countries are scrutinised on the basis of ten key issues including local budgetary policy making the policy effects of local budget deficits and public debt the rules of amortisation and debt instalment whether extensive fiscal controls promote budget accountability and discipline and how the Maastricht criteria concerning deficit and debt can be implemented They go on to highlight the complicated mix of rules administrative routines and co operative arrangements through which each country implements their individual budget controls Although these arrangements have been successful in avoiding serious fiscal imbalance in the last twenty years the authors argue that their impact on the broader goals of the government sector remains a more contentious question This book offers a broad understanding of the rich institutional variations and elaborate fiscal designs in Europe from a comparative perspective It will be welcomed by political scientists public sector managers and economists and scholars practitioners and advanced students of public policy and fiscal studies
