

Joint Chemical Agent Detector (JCAD)

Executive Summary

- Developmental and Operational Testing (DOTOT) results and an Operational Requirement (OR) supported a Milestone C low-rate initial production (LRIP) decision for Joint Chemical Agent Detector (JCAD) Increment 1 in June 2001.
- The Service Operational and Agency DOTOT conducted the JCAD Model-Service Operational Test and Evaluation (MSOTET) in July-August 2001. The Service ODAs are reducing data. Additional DOTOT of JCAD Increment 1 against chemical warfare agents in the presence of interferents must be completed before the ODA will complete their JCAD system evaluation.
- The Joint Program Executive Office for Chemical and Biological Defense (JPCCB) scheduled the JCAD full-rate production decision for 60,000 Increment 1 detectors for March 2005.
- JCAD Increment 2 demonstration testing among three variants is scheduled to begin January 2005.

System

- JCAD is a hand-held device that automatically detects, identifies, and alerts warfighters of the presence of nerve, blister, and blood chemical agents, and toxic toxic industrial chemicals, including chlorine.
- JCAD Increment 1 is a non-developmental item modified from a commercially available device. It will operate as a stand alone detector. It will be used by personnel and placed onto various platforms, including ground vehicles, fixed wing installations, and collective protection systems. It supplements or replaces existing fielded chemical agent vapor detectors.
- JCAD Increment 2 is a commercially available device designed to detect lower levels of chemical agents and will have a networking capability.
- The total quantity of Increment 1 systems is 60,000 detectors, with 6,000 low-rate initial production. The planned low-rate production decision for JCAD is 150,000 detectors.
- The JCAD will be used to:
 - Survey agents
 - Monitor plumes

Activity

- The JPCCB scheduled the JCAD program in 2000 to acquire a non-developmental item. The Single Acquisition Management Plan was approved in September 2000 and updated for the Milestone C low-rate initial production decision in June 2001.

- As Force aircraft, base recommendations, and ground service personnel
- Survey static installations, and forward or land-based units

Mission

- Use the JCAD to provide hazard level indications of chemical warfare agent and toxic industrial chemical vapors to alert personnel to take personal protection measures including masking, and wear force protection measures.
- JCAD will be employed in a wide variety of tasks including:
 - Personal chemical vapor detector
 - Monitor in and around a vehicle or shelter's interior and exterior or aircraft interior
 - Survey instrument for camp surveillance
 - Survey instrument for effectiveness of decontamination of personnel and equipment
 - Fixed installation monitor or array of monitors to provide remote warning

- The Joint Project Manager (JPM) with the Service ODAs conducted a comprehensive DOTOT program for the non-developmental JCAD Increment 1 in FY00 and FY01. They conducted the DOTOT against to provide data for decision by the JPCCB to determine readiness to start MOCLE.
