Their Players Jespera Juula      **Leader Development for Transforming Organizations** David V. Day, Stephen J. Zaccaro, Stanley M. Halpin, 2004-04-12 This book examines numerous topic areas that are considered to be especially relevant for making a strategic leader development investment The topics covered are areas that have theoretical and empirical connections to important aspects of growth change adult development and underlying abilities skills and competencies needed to lead effectively in times of great complexity In addition these are investment areas identified by the U S Army a world class organization faced with the need for radical transformation as particularly relevant for success and survival This book identifies key concerns in developing leaders and leadership and in transforming organizations to better meet the challenges of a complex world There are two aspects of this book that distinguish it from the numerous existing volumes on leadership in the scholarly and popular press literatures Most important the overarching focus of the present book is on development There are many offerings on the topic of leadership but relatively few that focus on leader development especially from a scholarly academic perspective Also this volume offers a unique perspective in examining those underlying psychological competencies and processes that are viewed as especially relevant for leader development The chapters that are collected in this edited volume were originally commissioned by the U S Army Research Institute as white papers to better help Army officers and researchers understand important issues in leader development The present organization of the papers is around four central themes a Accelerating Leader Development b Cognitive Skills Development c Developing Practical and Emotional Intelligence and d Enhancing Team Skills      *Forging the Sword* Benjamin Jensen, 2016-02-24 As entrenched bureaucracies military organizations might reasonably be expected to be especially resistant to reform and favor only limited incremental adjustments Yet since 1945 the U S Army has rewritten its capstone doctrine manual Operations fourteen times While some modifications have been incremental collectively they reflect a significant evolution in how the Army approaches warfare making the U S Army a crucial and unique case of a modern land power that is capable of change So what accounts for this anomaly What institutional processes have professional officers developed over time to escape bureaucracies iron cage Forging the Sword conducts a comparative historical process tracing of doctrinal reform in the U S Army The findings suggest that there are unaccounted for institutional facilitators of change within military organizations Thus it argues that change in military organizations requires incubators designated subunits established outside the normal bureaucratic hierarchy and advocacy networks championing new concepts Incubators ranging from special study groups to non Title 10 war games and field exercises provide a safe space for experimentation and the construction of new operational concepts Advocacy networks then connect different constituents and inject them with concepts developed in incubators This injection makes changes elites would have otherwise rejected a contagious narrative

**Reframing 9/11** Jeff Birkenstein, Anna Froula, Karen Randell, 2010-08-01 September 11th 2001 remains a focal point of American consciousness a site demanding ongoing excavation a site at which to mark before and after everything changed In

ways both real and intangible the entire sequence of events of that day continues to resonate in an endlessly proliferating aftermath of meanings that continue to evolve Presenting a collection of analyses by an international body of scholars that examines America's recent history this book focuses on popular culture as a profound discursive site of anxiety and discussion about 9/11 and demystifies the day's events in order to contextualize them into a historically grounded series of narratives that recognizes the complex relations of a globalized world Essays in Reframing 9/11 share a collective drive to encourage new and original approaches for understanding the issues both within and beyond the official political rhetoric of the events of the The Global War on Terror and issues of national security

**How Computer Games Help Children Learn** D. Shaffer, 2007-02-25 How can we make sure that our children are learning to be creative thinkers in a world of global competition and what does that mean for the future of education in the digital age David Williamson Shaffer offers a fresh and powerful perspective on computer games and learning How Computer Games Help Children Learn shows how video and computer games can help teach children to build successful futures but only if we think in new ways about education itself Shaffer shows how computer and video games can help students learn to think like engineers urban planners journalists lawyers and other innovative professionals giving them the tools they need to survive in a changing world Based on more than a decade of research in technology game science and education How Computer Games Help Children Learn revolutionizes the ongoing debate about the pros and cons of digital learning

**Terrorism TV** Stacy Takacs, 2012-04-30 The Fox TV series 24 might have been in production long before its premier just two months after 9/11 but its storyline and that of many other television programs has since become inextricably embedded in the nation's popular consciousness This book marks the first comprehensive survey and analysis of War on Terror themes in post 9/11 American television critiquing those shows that either blindly or intentionally supported the Bush administration's security policies Stacy Takacs focuses on the role of entertainment programming in building a national consensus favoring a War on Terror taking a close look at programs that comment both directly and allegorically on the post 9/11 world In show after show she chillingly illustrates how popular television helped organize public feelings of loss fear empathy and self love into narratives supportive of a controversial and unprecedented war Takacs examines a spectrum of program genres talk shows reality programs sitcoms police procedurals male melodramas war narratives to uncover the recurrent cultural themes that helped convince Americans to invade Afghanistan and Iraq and compromise their own civil liberties Spanning the past decade of the ongoing conflict she reviews not only key touchstones of post 9/11 popular culture such as 24 Rescue Me and Sleeper Cell but also less remarked upon but relevant series like JAG Off to War Six Feet Under and Jericho She also considers voices of dissent that have emerged through satirical offerings like The Daily Show and science fiction series such as Lost and Battlestar Galactica Takacs dissects how the War on Terror has been broadcast into our living rooms in programs that routinely offer simplistic answers to important questions Who exactly are we fighting Why do they hate us and she examines the climate of

fear and paranoia they've created Unlike cultural analyses that view the government's courting of Hollywood as a conspiracy to manipulate the masses her book considers how economic and industry considerations complicate state media relations throughout the era Terrorism TV offers fresh insight into how American television directly and indirectly reinforced the Bush administration's security agenda and argues for the continued importance of the medium as a tool of collective identity formation It is an essential guide to the televisual landscape of American consciousness in the first decade of the twenty first century
