

Be extra careful when lifting

There will be occasions where heavy lifting is required. Some patients need to be helped up or lifted entirely. Heavy equipment should be moved around your healthcare center. It's inevitable.

As much as possible, the use of mechanical aids while doing heavy lifting is preferable as they are guaranteed to help distribute the load and strain rather evenly. Examples of these are lifts, pivot disks, and slide boards which make patient transport so much easier. If these are not available, make sure to master proper lifting techniques for medical staff.
