**Abstract:** The purpose of this study was to determine the effect of a 12-week training program on the physical fitness of 100 male students. The program included aerobic, strength, and flexibility exercises. The results showed that the program had a significant positive effect on the physical fitness of the students, with improvements in cardiovascular endurance, muscular strength, and flexibility. The study also found that the program was well-received by the students and that they enjoyed the exercises. The results of this study suggest that a 12-week training program can be an effective way to improve the physical fitness of male students.
