Vylegzhanin, Oran R. Young, David A. Balton, Ole Rasmus Øvretveit, 2022-05-07 This book contains an inclusive compilation of perspectives about the Arctic Ocean with contributions that extend from Indigenous residents and early career scientists to Foreign Ministers involving perspectives across the spectrum of subnational national international jurisdictions The Arctic Ocean is being transformed with global climate warming into a seasonally ice free sea creating challenges as well as opportunities that operate short to long term underscoring the necessity to make informed decisions across a continuum of urgencies from security to sustainability time scales The Arctic Ocean offers a case study with lessons that are especially profound at this

moment when humankind is exposed to a pandemic awakening a common interest in survival across our globally interconnected civilization unlike any period since the Second World War This second volume in the Informed Decisionmaking for Sustainability series reveals that building global inclusion involves common interests to address changes effectively for the benefit of all on Earth across generations

A Physiologically-Based Approach to Study Different Types of Locomotion in Association with Core Performance Erika Zemková,Magni Mohr,Dario Novak ,Tomas Maly,2024-11-11 Good posture and strong core muscles are essential for most athletic movements but also for everyday activities Among them walking and running require lumbo pelvic stability and mobility for efficient movement and high level performance This is especially important during a large range of trunk motions when changing the direction of movement an abrupt walk to run transition or extreme uphill and downhill walking or running Such repetitive trunk loading over time can contribute to occurrence of back problems and lower limb injuries To avoid these unwanted effects a novel approach to studying the physiology of locomotion in relation to spine motion and balance function is required This can provide a basis for designing exercise programs specifically tailored for competitive athletes the healthy general population as well as those suffering from movement disorders So far much effort has been devoted to investigating the biomechanical and physiological variations of locomotion including walking running swimming or hopping However a surprising gap in the evidence is to what extent core strength contributes to effective locomotor performance and a healthy back Studying the neurophysiological mechanisms underlying the control of postural and core stability with special reference to locomotion is therefore of great importance
