

5. Open the display to a 90-degree angle. Then place the computer on the table with the keyboard upright as shown.
6. Support the Touch ID board as you route the Touch ID flex cable through the slot in the top case. Remove the Touch ID board from the keyboard side of the top case.

Important

- If the Touch ID board doesn't click properly before removal or the Touch ID sensor falls out when you remove the Touch ID board, continue to removal step 7 to replace the Touch ID sensor.
- Ensure that your work surface is clean. Under the Touch ID board is the Touch ID sensor, which is a small circular part. If it falls, you can more easily find it on a clean surface.
- If you're using the existing Touch ID sensor, skip to reassembly step 1.

7. Place the computer right side up. Spread the tips of the ESD-safe tweezers and use one tip to remove the sensor from the circular recess under the Touch ID board.

Note: The sensor has a small amount of adhesive and may stick to the top case.
