INSTRUCTIONS

SET UP

1. Set the Time Zone switch to your time zone (P – Pacific Time, M – Mountain Time, C – Central Time, E – Eastern Time). (See Figure 1)
2. Insert one fresh 1.5V AA battery, noting the correct polarity (+/-). (See Figure 1)
3. **Automatic Setting:** After the battery is inserted, hands will quickly advance until they reach 12:00. The clock will move at a normal rate until it receives the signal. The signal may be received as soon as a few minutes or up to a few days.
4. In most cases, the signal will be found overnight.

DAYLIGHT SAVINGS TIME (DST)

If you live in an area that does not recognize DST (Arizona or Indiana), push the DST switch to off. To reactivate, press the DST switch to on. (See Figure 1)

Figure 1

MANUAL TIME SETTING

On rare occasions, the clock may not connect to the radio signal within 24 hours because of the strength of the signal or geographic location.

The clock can be set manually and used as a regular quartz wall clock until it finds the radio signal.

When all hands stop at 12:00 you may advance the clock manually. Press and hold either Manual Set (M.SET) button until it reaches the correct time. When the clock successfully receives the signal, it will move to and keep the proper time. (See Figure 1)

CLOCK LOCATION GUIDELINES

WWVB is the National Institute of Standards and Technology (NIST) radio station in Fort Collins, CO. The WWVB time signal will easily penetrate masonry and wood frame buildings. The signal is obtainable in most steel buildings, providing there are adequate windows. It is not possible, however, for the signal to penetrate rooms in the center of large buildings that do not have windows. In buildings that the signal cannot penetrate, you may set the time using the manual time set button. When the clock is exposed to the signal, it will automatically set the hands to the exact time.

The clock should not be placed within 5 feet of any items that can interfere with reception: electronic appliances including televisions, radios, microwaves, computers, another radio controlled clock, phones or stereos.

Large metal surfaces such as aluminum or steel siding, metal counters or cabinets might also affect the reception.

The best reception will be on a wall near a window that is nearest to the direction of Fort Collins, Colorado. Due to the nature of long wave radio signals, it may not be possible to receive a signal during the day, so it is best to install the battery late in the evening.
