

## ANSWERS AND EXPLANATIONS

Each time a person enters the room, the computer generates a number and then randomly selects a name from the names placed in bowls for each group. The name that is called reads the problem, and that person then solves the problem. A new problem is then presented and the person that has read that problem randomly selects the answer to that problem.

After the 10 problems are all completed, each is read again. The group that has the highest number of correct answers then brings another problem up. The group that has the lowest number of correct answers then brings another problem up. The problem is presented to the two other groups, making them solve the problem as well.

The teacher takes 10 minutes and randomly selects the highest score group and the lowest score group for the Student, the other, reading the problem, making them solve the problem. The problem is presented to the two remaining students, making them solve the problem using a strategy of their choice. All four groups complete solving these through teamwork.

After all 20 problems are solved, the group that has the highest score gets a 10-minute break, getting the highest and lowest score groups challenged the final 10 problems.

The teacher gives a 5-minute break to the lowest score group. Then groups are all presented the final 10 problems and 10 minutes to solve the problems. Points are added.

The teacher then awards the winning group.

There are 10 groups. Each gets 10 problems. Each has 10 minutes to solve the problems.

**ANSWER EXPLANATIONS:** The first group of 10 is given the first 10 problems. The group that has the highest score gets a 10-minute break. The group that has the lowest score gets a 5-minute break.

**ANSWER EXPLANATIONS:** Each group gets 10 problems. The group that has the highest score gets a 10-minute break.
