Emotion Ross Buck,2014 **Emotion** , **Emotion** Ross Buck,2014-10-09 Emotions suffuse our lives a symphony of feeling usually whispering and murmuring in pianissimo but occasionally screaming and shouting in fortissimo crescendo filling every waking moment and even invading our dreams We can always be conscious of how happy sad annoyed or anxious we feel and also of the feelings we have relative to other persons pride envy guilt jealousy trust respect or resentment Developments in brain imaging and in capturing nuances of nonverbal display now enable the objective study of emotion and how biologically based primary emotions relate to higher level social cognitive and moral emotions This book presents an integrated developmental interactionist theory of emotion viewing subjective feelings as voices of the genes an affective symphony composed of dissociable albeit interactive neurochemical modules These primordial voices do not control but rather cajole our behavior with built in flexibility enabling the mindful application of learning reason and language

Cupchik,2016-07-28 Gerald C Cupchik builds a bridge between science and the humanities arguing that interactions between mind and body in everyday life are analogous to relations between subject matter and style in art According to emotional phase theory emotional reactions emerge in a perfect storm whereby meaningful situations evoke bodily memories that unconsciously shape and unify the experience Similarly in expressionist or impressionist painting an evocative visual style can spontaneously colour the experience and interpretation of subject matter Three basic situational themes encompass

complementary pairs of primary emotions attachment happiness sadness assertion fear anger and absorption interest disgust Action episodes in which a person adapts to challenges or seeks to realize goals benefit from energizing bodily responses which focus attention on the situation while providing feedback in the form of pleasure or pain regarding success or failure In high representational paintings style is transparent making it easier to fluently identify subject matter *The Interpersonal Dynamics of Emotion* Gerben A. van Kleef, 2016-04-21 Emotional expressions are omnipresent but how do they influence us This book highlights the pervasive interpersonal effects of emotions Beyond Virtue Liz Jackson, 2020-11-05 Educating students for emotional wellbeing is a vital task in schools However educating emotions is not straightforward Emotional processes can be challenging to identify and control How emotions are valued varies across societies while individuals within societies face different emotional expectations For example girls face pressure to be happy and caring while boys are often encouraged to be brave This text analyses the best practices of educating emotions The focus is not just on the psychological benefits of emotional regulation but also on how calls for educating emotions connect to the aims of society The book explores psychology's understanding of emotions the politics of emotions and philosophy It also discusses education for happiness compassion gratitude resilience mindfulness courage vulnerability anger sadness and fear
