Some say the world will end in fire, some say in ice,
From what I've tasted of desire I hold with those who favor fire,
But if it had to perish twice, I think I know enough of hate
To say that for destruction ice is also great and would suffice.

Sir Charnay, Eadweard Muybridge and Carleton Watkins His collection appears to have served largely as a source of inspiration and armchair travel reminding him of favorite locations and details of architecture culture and landscape In *Fire and Ice* images from Church's collection are shown along with a selection of his own oil sketches drawings and archival materials Some of the photographs are devoted to the varied geographical interests reflected in Church's art and travels Central and South America the Middle East and the polar North Others served as visual reference for the design and construction of Olana Lavishly illustrated *Fire Ice* shows how the photographs in Church's collection echoed the principal stages of the painter's career **Fire and Ice** Einar Haugen, 1967 *Fireheart* a full fledged warrior cat must confront questions of loyalty and identity as he faces the possibility of betrayal from within his own forest clan *Fire and Ice* Jonathan Mingle, 2025-06-25 High in the Himalayan valley of Zaskar in northwest India sits a village as isolated as the legendary Shangri La Long fed by runoff from glaciers and lofty snowfields Kumik a settlement of thirty nine mud brick

homes has survived and thrived in one of the world's most challenging settings for a thousand years. But now its people confront an existential threat: chronic crippling drought which leaves the village canal dry and threatens to end their ancient culture of farming and animal husbandry. *Fire and Ice* weaves together the story of Kumik's inspiring response to this calamity with the story of black carbon. Black carbon, from inefficient fires, the particulate residue that makes soot dark, is the second largest contributor to global warming after carbon dioxide. It's also a key ingredient of the air pollution that public health experts regard as humanity's greatest environmental health risk worldwide. Soot-laden smoke from household hearth fires and outdoor sources combine to kill over seven million people around the world every year. Jonathan Mingle describes the joys and struggles of daily life in the Zaskar Valley where villagers are buffeted by powerful environmental and economic forces while also tracing black carbon's dark fingerprints outward from Kumik and around the world. Mingle investigates its impacts on snow, ice, and water from Mt. Everest to California and the silent health epidemic it fuels from New York to New Delhi. Combining cultural history, detailed reportage, climate and energy science, and dramatic storytelling, *Fire and Ice* is a profound examination of the global challenges of averting climate chaos and lifting billions out of energy poverty and water scarcity. Can Kumik's people come together to reinvent fire, harness what remains of their life-sustaining ice, and reinvigorate their traditions of solidarity in time to save themselves? Can the rest of us rise to the same challenge? *Fire and Ice* connects these questions with the work of enterprising scientists, engineers, entrepreneurs, and activists around the world in a narrative that combines mythology, reason, humor, persistence, and hope in a race against a global clock.
