Focus *Ford Big-Block Parts Interchange* George Reid,2017-12-15 Over the course of performance car history and
specifically muscle car history big block engines are particularly beloved and for good reason Not only are they the essence
of what a muscle car is but before modern technology and stroker engines they were also the best way to make a lot of
horsepower All of the Detroit manufacturers had their versions of big block engines and Ford was no exception Actually Ford
was somewhat unique in that it had two very different big block engine designs during the muscle car era The FE engine was
a design pioneered in the late 1950s primarily as a more powerful replacement for the dated Y block design because cars
were becoming bigger and heavier and therefore necessitated more power to move What started as torquey engines meant to
move heavyweight sedans morphed into screaming high performance mills that won Le Mans and drag racing championships
through the 1960s By the late 1960s the design was dated so Ford replaced the FE design with the 385 series also known as
the Lima design which was more similar to the canted valve Cleveland design being pioneered at the same time It didn't
share the 1960s pedigree of racing success but the new design was better in almost every way it exists via Ford motorsports
offerings to this day In *Ford Big Block Parts Interchange* Ford expert and historian George Reid covers both engines
completely Interchange and availability for all engine components are covered including cranks rods pistons camshafts
engine blocks intake and exhaust manifolds carburetors distributors and more Expanding from the previous edition of *High*
Performance Ford Parts Interchange that covered both small and big block engines in one volume this book cuts out the
small block information and devotes every page to the FE Series and 385 big blocks from Ford which allows for more

which Ford parts work with which Ford engines is a far more difficult task than with many other engine families Will
Cleveland heads fit on my Windsor block Can I build a stroker motor with factory parts Can I gain compression by using older
