Death by Moderation David A. Koplow,2010 This book addresses an important but little noticed phenomenon in the revolutionary world of military technology Across a wide range of otherwise unrelated weapons programs the Pentagon is now pursuing arms that are deliberately crafted to be less powerful less deadly and less destructive than the systems they are designed to supplement or replace This direction is historically anomalous military forces generally pursue ever bigger bangs but the modern conditions of counter insurgency warfare and military operations other than war such as peacekeeping and humanitarian assistance demand a military capable of modulated force By providing a capacity to intervene deftly yet effectively the new generations of useable weaponry should enable the U S military to accomplish its demanding missions in a manner consistent with legal obligations public relations realities and political constraints Five case studies are provided

Feaver, Christopher Gelpi, 2011-10-30 America's debate over whether and how to invade Iraq clustered into civilian versus military camps Top military officials appeared reluctant to use force the most hawkish voices in government were civilians who had not served in uniform and everyone was worried that the American public would not tolerate casualties in war This book shows that this civilian military argument which has characterized earlier debates over Bosnia Somalia and Kosovo is typical not exceptional Indeed the underlying pattern has shaped U S foreign policy at least since 1816 The new afterword by Peter Feaver and Christopher Gelpi traces these themes through the first two years of the current Iraq war showing how civil military debates and concerns about sensitivity to casualties continue to shape American foreign policy in profound ways
