Karp,Barbara J. Dougherty,Sarah B. Bush,2020-09-19 A school wide solution for students mathematics success Do you sometimes start to teach a mathematics concept and feel like

you're staring at a sea of bewildered faces. What happens when you discover students previously learned a calculation trick or a mnemonic that has muddled their long-term understanding? When rules seem to change from year to year, teacher to teacher, or school to school, mathematics can seem like a disconnected mystery for students. Clear up the confusion with a Mathematics Whole School Agreement. Expanded from the highly popular Rules that Expire series of NCTM articles, this essential guide leads educators through the collaborative step-by-step process of establishing a coherent and consistent learner-centered and equitable approach to mathematics instruction. Through this work, you will identify, streamline, and become passionate about using clear and consistent mathematical language, notations, representations, rules, and generalizations within and across classrooms and grades. Importantly, you'll learn to avoid rules that expire—tricks that may seem to help students in one grade but hurt in the long run. Features of this book include abundant grade-specific examples, effective working plans for sustainability, barrier-busting tips to do and try it out, practical templates and checklists, PLC prompts and discussion points. When teachers unite across grades, students hit the ground running every year. Take the next step together as a team and help all your students build on existing understanding to find new success and, most importantly, love learning and doing mathematics.

Resources in Education, 2001-10 *Connected Newsletter*, 2006 *The Active Classroom Field Book* Ron Nash, 2010-07-23 Every teacher keeps two or three books for constant reference while planning units and designing lessons; this is one of those books. *The Active Classroom Field Book* provides field-tested strategies for engaging students in learning disguised as fun. Jennifer Sinsel, Gifted Facilitator, Wichita Public Schools, KS. This book is packed with ideas on how to let the students do the learning while the teacher guides them. The included real-life vignettes bring even more clarity to each concept, allowing the reader to experience the vitality each will bring to the classroom.

William Richard Hall Jr., Principal, Longan Elementary School, Henrico, VA. Discover what really works in the classroom through success stories from educators like you. The best classrooms are dynamic environments that actively engage students in learning. In this exciting new resource, best-selling author and educational consultant Ron Nash shares the stories of practicing teachers who have successfully implemented active teaching methods in their classrooms. Expanding on the strategies in *The Active Classroom*, Nash uses educator stories and classroom vignettes to pinpoint how active techniques are working in schools across the country. This resource includes chapters on student-to-student conversations, classroom process, student movement, feedback, and continuous improvement through reflection. Vignettes that set the stage for each chapter, lesson plan segments, and anecdotes from teachers in Grades K-12 and college settings. Ideal as a companion to *The Active Classroom* or on its own, *The Active Classroom Field Book* is the ultimate resource to help teachers transform students into active participants in their own learning.

Playful Pedagogy in the Pandemic Emily K. Johnson, Anastasia Salter, 2022-08-26 Educational technology adoption is more widespread than ever in the wake of COVID-19, as corporations have commodified student engagement in makeshift packages marketed as gamification. This book seeks to create a space for

playful learning in higher education asserting the need for a pedagogy of care and engagement as well as collaboration with students to help us reimagine education outside of prescriptive educational technology Virtual learning has turned the course management system into the classroom and business platforms for streaming video have become awkward substitutions for lecture and discussion Gaming once heralded as a potential tool for rethinking our relationship with educational technology is now inextricably linked in our collective understanding to challenges of misogyny white supremacy and the circulation of misinformation The initial promise of games based learning seems to linger only as gamification a form of structuring that creates mechanisms and incentives but limits opportunity for play As higher education teeters on the brink of unprecedented crisis this book proclaims the urgent need to find a space for playful learning and to find new inspiration in the platforms and interventions of personal gaming and in turn restructure the corporatized surveilling classroom of a gamified world Through an in depth analysis of the challenges and opportunities presented by pandemic pedagogy this book reveals the conditions that led to the widespread failure of adoption of games based learning and offers a model of hope for a future driven by new tools and platforms for personal experimental game making as intellectual inquiry *The Math Pact, Middle School* Sarah B.
