2016 and organised by the Aga Khan University Institute for Educational Development East Africa AKU IED EA At present Tanzania's development direction is guided by Vision 2025 which aims to achieve a high quality livelihood for its people. The attainment of Vision 2025 will depend largely on rapid socio-economic development based on several social and economic pillars including most importantly education. Clearly for Tanzania the scope and quality of education remains the single most important prerequisite to the attainment of Vision 2025 and the 17 Sustainable Development Goals (SDGs). The individual chapters in this publication and their collective thrust discuss the challenges in the education system in good faith and in the spirit of cooperation and collaboration guided by the belief that it is not the responsibility of the Government alone to see how these can be addressed. AKU IED EA has identified this as the responsibility of all well-meaning corporate bodies and citizens and initiated this conference of its type as its contribution to the conference as well as the publication has to be seen as a model of good practice for universities in terms of sharing knowledge, experience and practice with other stakeholders who are not in the academy and more so with politicians as well as government policy planners. The various authors of *Education in Tanzania in the Era of Globalisation: Challenges and Opportunities* discuss issues within the context of the Tanzanian political economy against the effects of globalization and seek to initiate a new kind of debate that is long overdue: a debate aimed at charting out appropriate strategies whose objective is to improve the quality of education in Tanzania so that it becomes a useful vehicle in enhancing processes of social change, transformation and development.
