Burnt by Democracy Jacqueline Kennelly, 2023-11-30 Burnt by Democracy traces the political ascendance of neoliberalism and its effects on youth The book explores democracy and citizenship as described in interviews with over forty young people ages 16 to 30 who have either experienced homelessness or identify as an activist living in five liberal democracies Canada Australia New Zealand the United States and the United Kingdom Highlighting significant cuts to social and affordable housing astronomical increases in the costs of higher education and the transformation and erosion of state benefits systems Jacqueline Kennelly argues that democracy s decline is not occurring because young people are apathetic or focused on informal politics or unaware of their civic duties Rather it is because of collective misunderstanding about how democracy is actually structured how individuals learn to participate and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions Against a vivid and often heart breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever expanding state retrenchment and inequality Burnt by Democracy makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing

field for all **World Development Report 2018** World Bank Group,2017-10-16 Every year the World Bank's World Development Report WDR features a topic of central importance to global development The 2018 WDR **LEARNING to Realize Education's Promise** is the first ever devoted entirely to education And the time is right education has long been critical to human welfare but it is even more so in a time of rapid economic and social change The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education The 2018 WDR explores four main themes First education's promise education is a powerful instrument for eradicating poverty and promoting shared prosperity but fulfilling its potential requires better policies both within and outside the education system Second the need to shine a light on learning despite gains in access to education recent learning assessments reveal that many young people around the world especially those who are poor or marginalized are leaving school unequipped with even the foundational skills they need for life At the same time internationally comparable learning assessments show that skills in many middle income countries lag far behind what those countries aspire to And too often these shortcomings are hidden so as a first step to tackling this learning crisis it is essential to shine a light on it by assessing student learning better Third how to make schools work for all learners research on areas such as brain science pedagogical innovations and school management has identified interventions that promote learning by ensuring that learners are prepared teachers are both skilled and motivated and other inputs support the teacher learner relationship Fourth how to make systems work for learning achieving learning throughout an education system requires more than just scaling up effective interventions Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress building coalitions for learning and taking an adaptive approach to reform **Getting Into Good Trouble at School** Gregory C. Hutchings, Jr.,Douglas S. Reed,2022-05-10 Turn the promise of equitable education into reality This is your guidebook for building an antiracist school Written by two education leaders with very different life experiences *Getting into Good Trouble At School* provides the context empowerment and concrete actions needed to dismantle racist policies and practices that for decades have kept students of color from experiencing the same success as their white counterparts The journeys of Gregory Hutchings and Douglas Reed which include systemic racism and white privilege provide a unique model superintendents principals school board members and other educators can use to reimagine educational equity actively dismantle institutional racism and implement strategic methodical policies that benefit the entire school community In this book you ll find A detailed case study of antiracist educational transformation What it really means to commit to racial equity Guidance for dismantling tracking and in school segregation Positive equitable alternatives to typical disciplinary practices Six steps to building an antiracist school system Racism isn't always intentional Antiracism on the other hand must be Now antiracist education leaders can put their intentions into action and grant the promise of an equitable and culturally rich education to all students *The Politics of Education in Developing Countries* Samuel Hickey,Naomi Hossain,2019 This book focuses on

how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries It deploys a new conceptual framework to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes *South African Schooling: The Enigma of Inequality* Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI ICASD MBW 2022 Mangesh M Ghonge, Akanksha Upadhyaya, Richard A Montanaro, 2023-02-28 In today's complicated environment strategic organizational decision making is a dynamic process marked by a high degree of uncertainty It is anticipated that the technological potential of artificial intelligence AI will provide additional support but research in this area is still in its early stages Nonetheless because the technology is intended to perform functions beyond those of traditional machines the implications for the division of work and the defining of roles established in the current human machine relationship are being explored with more awareness Taking this into consideration ICASD MBW 2022 was flourishingly organized on Dec 16/17 2022 at
