Russia's inability to fully rewrite its Soviet history plays an essential part in its current political agenda. Diverse contributors consider the many ways in which public narrative shapes Russian culture from cinema, television, and music to museums, legislature, and education, as well as how patriotism reflected in these forms of culture implies a casual acceptance of the valorization of Stalin and his role in World War II. The Future of the Soviet Past provides effective and nuanced examples of how Russia has reimagined its Soviet history as well as how that past still influences Russia's policymaking.

Department of Homeland Security Appropriations for 2016 United States. Congress. House. Committee on Appropriations. Subcommittee on Homeland Security, 2015

The Inheritance Niki Kapsambelis, 2017-03-07 This gripping story of the doctors at the forefront of Alzheimer's research and the courageous North Dakota family whose rare genetic code is helping to understand our most feared diseases is excellent, accessible. A science text that reads like a mystery and treats its subjects with humanity and sympathy. Library Journal starred review. Every sixty-nine seconds someone is diagnosed with Alzheimer's disease. Of the top ten killers, it is the only disease for which there is no cure or treatment. For most people, there is nothing that they can do to fight back. But one family is doing all they can. The DeMoe family has the most devastating form of the disease: that there is early-onset Alzheimer's, an inherited genetic mutation that causes the disease in one hundred percent of cases and has a fifty percent chance of being passed onto the next generation. Of the six DeMoe children, whose father had it, five have inherited the gene; the sixth daughter, Karla, has inherited responsibility for all of them. But rather than give up in the face of such news, the DeMoes have agreed to spend their precious abbreviated years as part of a worldwide study that could utterly change the landscape of Alzheimer's research and offers the brightest hope for future treatments and possibly a cure. Drawing from several years of in-depth research with this charming and upbeat family, journalist Niki Kapsambelis tells the story of Alzheimer's through the humanizing lens of these ordinary people made extraordinary by both their terrible circumstances and their bravery. A compelling narrative and an educational and emotional chronicle. Kirkus Reviews starred review. Their tale is intertwined with the dramatic narrative history of the disease, the cutting-edge research that brings us ever closer to a possible cure, and the accounts of the extraordinary doctors spearheading these groundbreaking studies. From the oil fields of North Dakota to the jungles of Colombia, this inspiring race against time redefines courage in the face of this most pervasive and mysterious disease.

School Choice and the Betrayal of Democracy Robert Asen, 2021-10-04 Evidence shows that the increasing privatization of K-12 education siphons resources away from public schools, resulting in poorer learning conditions, underpaid teachers, and greater inequality. But as

Robert Asen reveals here the damage that market based education reform inflicts on society runs much deeper At their core these efforts are antidemocratic Arguing that democratic communities and public education need one another Asen examines the theory driving privatization popularized in the neoliberalism of Milton and Rose Friedman as well as the case for school choice promoted by former secretary of education Betsy DeVos and the controversial voucher program of former Wisconsin governor Scott Walker What Asen finds is that a market based approach holds not just a different view of distributing education but a different vision of society When the values of the market choice competition and self interest shape national education that policy produces individuals Asen contends with no connections to community and no obligations to one another The result is a society at odds with democracy Probing and thought provoking School Choice and the Betrayal of Democracy features interviews with local on the ground advocates for public education and offers a countering vision of democratic education one oriented toward civic relationships community and equality This book is essential reading for policymakers advocates of public education citizens and researchers *Making Politics Work* Paul T. Hill, Ashley E. Jochim, 2025-03-31

An expansive study shows how politics can work for not just against efforts to improve America's schools The education reform project has always been about making America's schools more effective for the children who attend them In *Making Politics Work* authors Paul T Hill and Ashley E Jochim show that this project cannot succeed without mastering what is the single largest constraint on its success politics Drawing upon more than a decade of work with dozens of school systems Hill and Jochim show how failures to secure political support or mitigate inevitable opposition dooms the education reform project from the start But this outcome is not inevitable By tracing the evolution of the portfolio strategy across 27 localities that implemented it they uncover practical lessons that superintendents state leaders and foundation officials can use to increase the likelihood that their ideas for improving public education don't join the list of once promising initiatives that could not be sustained in the face of intractable political conflict **Knowledge Discovery in Big Data**

from Astronomy and Earth Observation Petr Skoda, Fathalrahman Adam, 2020-04-10 Knowledge Discovery in Big Data from Astronomy and Earth Observation Astrogeoinformatics bridges the gap between astronomy and geoscience in the context of applications techniques and key principles of big data Machine learning and parallel computing are increasingly becoming cross disciplinary as the phenomena of Big Data is becoming common place This book provides insight into the common workflows and data science tools used for big data in astronomy and geoscience After establishing similarity in data gathering pre processing and handling the data science aspects are illustrated in the context of both fields Software hardware and algorithms of big data are addressed Finally the book offers insight into the emerging science which combines data and expertise from both fields in studying the effect of cosmos on the earth and its inhabitants Addresses both astronomy and geosciences in parallel from a big data perspective Includes introductory information key principles applications and the latest techniques Well supported by computing and information science oriented chapters to introduce

also embodied conservative values ranging from anticommunism to white supremacy to a crusading and politicized interpretation of Christianity This garnered him the admiration of millions of Americans He stayed in office for so long because many people from the highest reaches of government down to the grassroots wanted him there and supported what he was doing thus creating the template that the political right has followed to transform its party G Man places Hoover back where he once stood in American political history not at the fringes but at the center and uses his story to explain the trajectories of governance policing race ideology political culture and federal power as they evolved over the course of the 20th century
