Science Chemist Clive Long, 2010 Normal Instructor and Teachers World ,1923 *The Education Systems of Europe*
Wolfgang Hörner, Hans Döbert, Botho von Kopp, Wolfgang Mitter, 2007-05-03 Education is a paradoxical phenomenon On the
one hand it is universal as since the period of Enlightenment it has been declared universal good for everybody Moreover we
learnt by historical research following the ideas of world system theory that since this time as far as its main structures are
concerned compulsory state education given by professional teachers in classrooms it took even universal traits However on
the other hand the fact that education became state education organised or at least controlled by the state was the beginning
of another tradition line education in the form of state organised educational institutions became a means of creating
national identity Universal inclusion as for the light of reason shining for everybody is opposed to more or less nationalist
exclusion of all the others shaping the feature of a particular nation state with a particular educational system This
fundamental dialectical tension between the universal and the particular was one of the important motives to make this
handbook One of the central issues of the country studies is precisely to display the relationship between universal values and
the search for national identity Another motive is given by the European dimension of the handbook *Primary Plans* ,1913
Undergraduate Catalog ... Northern Illinois State Teachers College, Northern Illinois State Normal School, Northern
Illinois University, 1929 **Journal of Education** ,1895 Announcement of the Summer Term ,1941
