INTRODUCTION

Thank you for purchasing our LED replacement headlights and improving the safety of your vehicle and the safety of the occupants inside! We have designed these LED replacement headlights to be as easy as possible to install. At Quake LED, we always suggest you leave it to the professionals and have a qualified Quake LED technician install and aim your new headlights into your vehicle.

UNPACKING and PRE-INSTALLATION

Carefully remove all the components and place it on a flat surface, taking care not to scratch or damage it. Examine for any visible damage caused by shipping and report any damage to the carrier and keep the shipping package. Take a good look at all the components and the wire diagram so you are familiar with it before opening the hood.

TOOLS NEEDED

- Flat Head Screw Driver
- Ratchet
- 10mm Socket

- Nylon Panel Removal Tool
- Ratchet Extension
- Pliers

Your Quake LED JL headlights come standard with high/low beams and also feature RGB Accenting and Sequential Amber Turn Signals! We advise to take advantage of these great features and use them.

Keep in mind that you should route any wires that is safe, dry and clear of moving or rotating parts or any excessive heat sources. Excessive or prolonged heat can damage the protection wire loom leading to wire chaffing that could break wires and cause a short circuit. We have weatherproofed the RGB Controller unit to withstand small amounts of water. We recommended that you place the RGB Controller unit far away from heavy water areas such as the windshield wiper/roof drain areas. Next to the battery on the passengers side is perfect.

PROCESS

STEP 1. Open the hood and remove the double stage plastic pop clips that run along the top edge of the grill and holds the grill together. With your nylon panel removal tool or flathead screwdriver. Place the head of the tool under the pop clip head and gentle pry up a little. Use your fingers to take out the top section of the pop clip. Gentle pry up the grill plastic with your hands to loosen the lower section of the pop clip. Then work your way down the line to pop out all 6 pop clips.
