A History of the Ideas of Theoretical Physics S.

D'Agostino, 2001-11-30 This book presents a perspective on the history of theoretical physics over the past two hundreds years It comprises essays on the history of pre Maxwellian electrodynamics of Maxwell s and Hertz s field theories and of the present century s relativity and quantum physics A common thread across the essays is the search for and the exploration of themes that influenced significant conceptual changes in the great movement of ideas and experiments which heralded the emergence of theoretical physics hereafter TP The fundamental change involved the recognition of the scientific validity of theoretical physics In the second half of the nineteenth century it was not easy for many physicists to understand the nature and scope of theoretical physics and of its adept the theoretical physicist A physicist like Ludwig Boltzmann one of the eminent contributors to the new discipline confessed in 1895 that even the formulation of this concept of a theoretical physicist is not entirely without difficulty 1 Although science had always been divided into theory and experiment it was only in physics that theoretical work developed into a major research and teaching specialty in its own right 2 It is true that theoretical physics was mainly a creation of turn of the century German physics where it received full institutional recognition but it is also undeniable that outstanding physicists in other European countries namely Ampere Fourier and Maxwell also had an important part in its creation

The Deadly Ideas of Neoliberalism Rick Rowden, 2013-07-04

The Deadly Ideas of Neoliberalism explores the history of and current collision between two of the major global phenomena that have characterized the last 30 years the spread of HIV AIDS and other diseases of poverty and the ascendancy of neoliberal economic ideas The book explains not only how IMF policies of restrictive spending have exacerbated public health problems in developing countries in particular the HIV AIDS crisis but also how such issues cannot be resolved under these economic policies It also suggests how mounting global frustration about this inability to adequately address HIV AIDS will ultimately

lead to challenges to the dominant neoliberal ideas as other more effective economic ideas for increasing public spending are sought In stark powerful terms Rowden offers a unique and in depth critique of development economics the political economy dynamics of global foreign aid and health institutions and how these seemingly abstract factors play out in the real world from the highest levels of global institutions to African finance and health ministries to rural health outposts in the countryside of developing nations and back again

This Generation Leads: The Latest Leadership Ideas from South Africa Mike Teke,Muzi Kuzwayo,2022-03-01 This book was born out of an idea that I had during the period in which I spent time with several young people who had approached me to assist them in different ways including personal development career advancement and growth as well as growing their businesses and entrepreneurial acumen and skills I took the challenge but felt that more could be achieved hence this book The chapters in this book are written by each one of these young people They chose the topics guided by me and the plan was to simply convey a message from each one of them about leadership They did not do this for fame or to sell this book to make money but to share their ideas The topics covered in this book will appeal to different readers and some readers might find more lessons in one chapter or in more chapters than one I urge each one of you who read this book to pick one or a few lessons and share it with those you wish to make a difference to Mentorship of young people is critical but this does not mean that the mentors will provide handouts in the form of money People who wish to grow are not interested in money they are interested in a piece of your generous heart Mike Teke

Eastern and Western Ideas for African Growth Kenichi Ohno,Izumi Ohno,2013-05-29 The West and the East approach economic development differently The Europeans and Americans stress free and fair business climate promoting private activities generally without picking winners and improving governance East Asia is interested in achieving concrete results and projects rather than formal correctness prioritizing a few sectors for industrialization and eventual graduation from aid The West mostly shapes shifting strategies of the international donor community while the East has in reality made remarkable progress in industrial catch up The two approaches cannot be merged easily but they can be used in proper combination to realize growth and economic transformation This book proposes more dialogue and complementarity between the two in the development effort of Africa and other regions In this collected volume contributed by experts and practitioners from both East and West the need to introduce Eastern ideas to the global development strategy is emphasized Analysis of British and other Western donor policies is given while Japanese Korean and other Asian approaches are also explained with concrete examples The concept of governance for growth is presented and the impact of rising China on development studies is contemplated The practices

of industrial policy dialogues and actions assisted by East Asian experts are reported from Tunisia Zambia Ethiopia Rwanda and others The book should be applicable to all donors institutions NGOs and business enterprises engaged in development cooperation *The World is a Text: Writing About Visual and Popular Culture* Jonathan Silverman,Dean Rader,2018-04-30
