IGBC Green Homes® Rating System Indian Green Building Council, 2013 Smart Energy Practices for a Sustainable World Nina S. Godbole, John P. Lamb, 2023-06-13

Mankind has scaled unprecedented growth since the advent of the Industrial Revolution. However, this progress has come at the hefty cost of environmental degradation. Climate change undeniably is one of the biggest challenges of the planet Earth and is largely anthropogenic. In the modern world context, the phenomenon of climate change is one of the most defining issues when it comes to realizing objectives of the Sustainable Development Goals (SDGs). Climate change is not limited to geographical boundaries; it is a global problem hence requires global solutions. It has been widely discussed and therefore has acquired centre stage across the major world forums. *Smart Energy Practices for a Sustainable World* how we all can contribute stresses the need for us to judiciously sustainably and smartly harness and use energy techniques in order to effectively combat climate change. The book also gives an in-depth discussion on utilization of artificial intelligence and information technology to realize energy efficiency in various sectors of economy including but not limited to transportation, buildings, infrastructure, health care, and other services. Text is supplemented by case studies that depict ground level reality to facilitate comprehension of the subject matter. The appendices serve as an extended learning of the concepts discussed in the chapters. The publication would serve as a valuable reference for both scholars and researchers engaged in the domain in addition to being a guide to industry as well as the academic world.

Designing Green Cement Plants S.P. Deolalkar, Anil Shah, Naresh Davergave, 2015-09-02

Cement production is known to be a polluting and energy intensive industry. Cement plants account for 5 percent of global emissions of carbon dioxide and one of the main causes of global warming. However, cement is literally the glue of progress. *Designing Green Cement Plants* provides the tools and techniques for designing new large cement plants that would promote sustainable growth, preserve natural resources to the maximum possible extent, and make least possible additions to the Greenhouse Gases that cause global warming. Brief and but authoritative, this title embraces new technologies and methods such as Carbon Capture and Sequestration as well as methods for harnessing renewable energy sources such as wind and solar. The author also discusses the efficient use of energy and materials through the use of recycling. In addition, this book also examines the possibilities of developing green cement substitutes such as Calera, Calix, Novacem, Aether, and Geopolymer cements. Includes the tools and

methods for reducing the emissions of greenhouse Gases Explores technologies such as carbon capture and storage and substitute cements Provides essential data to determining the unique factors involved in designing large new green cement plants Includes interactive excel spreadsheets Methods for performing a cost benefits analysis for the production of green cements as opposed to conventional OPC

A Candle in the Wind Markose Abraham, A CANDLE IN THE WIND focuses on the prominence of the new women working for the Corporate India of 2013 Breaking traditions they have learnt the ropes of pushing through tenders contracts in a nation cursed for its political corruption and bureaucratic red tape Contrary to stereotypes some who have even surprised the West s perception of women in business have stormed the male bastion in reading minds with sharp acumen and winning over covert deals for their customers with alacrity and temerity quite often at risk to themselves and their family The 40 year old corporate lobbyist US UK educated wife to a cardiologist and mother of two teen aged children based in New Delhi JSK as she is popularly known an adept at multi tasking balances her official work with that of her family obligations amidst the venal business climate of a country turning the corner to become a world leader JSK is seen to be always on the move from East to West in the corridors of power putting her feminine wiles to best use Her life has been like the candle in the open space flickering bright to provide light to many while always at peril to the fluctuating moods of the wind

Green Building Guidance Karthik Karuppu, NVICO,2019-02-07 Conventional buildings don t have sustainability because of the approach of designing and the construction method The total energy consumption calculates for all buildings account for up to 40% in India and commercial and residential real estate combined will account for more than 2000 TWH of energy consumption by 2030 India has an expected energy deficit of around 12% which is one of the major hurdles for the government This will result in a further increase in electrification in all areas Green buildings utilize fewer resources and are healthier to live in They offer significant operational cost savings compared with conventional buildings In effect green homes can expect a 14 percent savings in operational costs over five year savings for new green buildings and 13 percent savings in operational costs over five years for green retrofit and renovation projects Building owners also report that green buildings whether new or renovated give a 7 percent increase in asset value over conventional buildings
