The Annotated Bibliography of International Programme Evaluation Craig Russon, Karen Russon, 2012-12-06 The evaluation profession has experienced rapid growth in the past five years Prior to 1995 there were five national evaluation organizations the American Evaluation Association AEA the Asociacion Centroamericana de Evaluacion ACE the Australasian Evaluation Society AES the Canadian Evaluation Society CES and the European Evaluation Society EES In November 1995 AEA and CES cosponsored an international evaluation conference in Vancouver of the conference was Evaluation for a New British Columbia The theme Century A Global Perspective Delegates from 50 countries throughout Europe Australia New Zealand Asia Africa and Central and South America attended the conference The conference combined workshops and lecture formats to bring participants the most up to date and relevant information in a variety of sectors Following the Vancouver conference there was a gestation period after which several national evaluation organizations in Europe were born AEA CES Evaluation 95 On Site Program In 1997 EES held a conference in Stockholm The theme of the conference was What Works and for Whom More than 280 evaluation professionals from 30 countries in Europe and throughout the world attended the conference The conference provided a forum for academic professionals and civil servants to meet and share their experiences Leaders emerged with goals to increase membership and to create extensive professional networks within the society EES Newsletter 2 97 *International Handbook on Geographical Education* Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical

education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

7th RILEM International Conference on Cracking in Pavements A. Scarpas, Niki Kringos, I. Al-Qadi, Loizos A., 2012-08-30 In the recent past new materials laboratory and in situ testing methods and construction techniques have been introduced In addition modern computational techniques such as the finite element method enable the utilization of sophisticated constitutive models for realistic model based predictions of the response of pavements The 7th RILEM International Conference on Cracking of Pavements provided an international forum for the exchange of ideas information and knowledge amongst experts involved in computational analysis material production experimental characterization design and construction of pavements All submitted contributions were subjected to an exhaustive refereed peer review procedure by the Scientific Committee the Editors and a large group of international experts in the topic On the basis of their recommendations 129 contributions which best suited the goals and the objectives of the Conference were chosen for presentation and inclusion in

the Proceedings The strong message that emanates from the accepted contributions is that by accounting for the idiosyncrasies of the response of pavement engineering materials modern sophisticated constitutive models in combination with new experimental material characterization and construction techniques provide a powerful arsenal for understanding and designing against the mechanisms and the processes causing cracking and pavement response deterioration As such they enable the adoption of truly mechanistic design methodologies The papers represent the following topics Laboratory evaluation of asphalt concrete cracking potential Pavement cracking detection Field investigation of pavement cracking Pavement cracking modeling response crack analysis and damage prediction Performance of concrete pavements and white toppings Fatigue cracking and damage characterization of asphalt concrete Evaluation of the effectiveness of asphalt concrete modification Crack growth parameters and mechanisms Evaluation quantification and modeling of asphalt healing properties Reinforcement and interlayer systems for crack mitigation Thermal and low temperature cracking of pavements and Cracking propensity of WMA and recycled asphalts
