

Internship Application

2 pages | 331 words

I write to apply for a position in this internship program. My strong commitment to my works has been demonstrated to my numerous volunteer experiences in the community and at university.

Throughout my degree, I volunteered weekly at local primary schools where I taught grade 4 and 5 mathematics. Seeing the students light up with excitement while participating in a science experiment or the student who has struggled with a mathematical concept finally understand what to do has been immeasurably rewarding for me. Beyond the rewards, these experiences have taught me how to tailor my approach to the students' needs and effectively communicate concepts to a group, skills I know would serve me well in my future jobs.

I have a genuine interest in learning as much as possible about a career in business and finance and would view any task put before me as a positive learning experience. Through my study as a mathematics student at Cornell University, I have proven my ability to maintain high curiosity, learn complicated things and not giving up easily. Proficient in statistical, business data analysis, and excels in collaborative team-based environments, I believe it is a perfect way to utilise my skills to solve business and financial problems.

My primary goal in beginning a career in business and finance is to acquire as much experience as possible. Not only I hope to deepen my knowledge in current business and financial worlds, but I would also hope to acquire some of the practical skills that I will need to be better equipped for this field. I believe that working in business and finance, I would have the privilege to appreciate that everything in the world somehow affects my works. I would hope that this internship would provide an opportunity to build a working relationship with leaders in the field from whom I could gain valuable knowledge. I am certain that any experience from this internship would prove to be indispensable to me in accomplishing my future goals.
