## Principles and guidelines for social impact assessment in the USA

### The Interorganizational Committee on Principles and Guidelines for Social Impact Assessment

*The 2003 version of Principles and Guidelines for Social Impact Assessment (SIA) in the USA provides guidance for the conduct of SIA within the context of the US National Environmental Policy Act of 1970. Guidelines are integrated within six principles focusing on: understanding of local and regional settings; dealing with the key elements of the human environment; using appropriate methods and assumptions; providing quality information for decision making; ensuring that environmental justice issues are addressed; and establishing mechanisms for evaluation/monitoring and mitigation. A social impact assessment model is outlined followed by suggested social impact assessment variables. The document concludes with the detailed steps in the SIA process.*

SINCE PASSAGE OF the US National Environmental Policy Act (NEPA) of 1970, environmental impact assessment has become the key component of environmental planning and decision making in the United States. Agency planners and decision makers have recognized a need for better understanding of the social consequences of policies, plans, programs and projects (PPPPs).

In response to this need, a group of social scientists formed the Interorganizational Committee on Guidelines and Principles for Social Impact Assessment<sup>1</sup> (SIA) in 1992, with the purpose of outlining a set of guidelines and principles that would assist public- and private-sector agencies and organizations to fulfill their obligations under the NEPA, related authorities and agency mandates (BOGIP, 1993). This monograph is the decade update of the original.

In the 2003 version, we continue to define social impact assessment in terms of efforts to assess, appraise or estimate, in advance, the social consequences that are likely to follow from proposed actions. These include: specific government or private projects, such as construction of buildings, siting power generation facilities, large transportation projects, managing natural resources, fish and wildlife; and preserving or leasing large tracts of land and the adoption of new policies and resulting plans

#### Box 1. Social impacts

By social impacts we mean the consequences to human populations of any public or private actions—that alter the ways in which people live, work, play, relate to one another, organize to meet their needs and generally cope as members of society. The term also includes cultural impacts involving changes to the norms, values, and beliefs that guide and rationalize their cognition of themselves and their society.

**Dams and Development in China** Bryan Tilt, 2014-12-02 China is home to half of the world's large dams and adds dozens more each year The benefits are considerable dams deliver hydropower provide reliable irrigation water protect people and farmland against flooding and produce hydroelectricity in a nation with a seemingly insatiable appetite for energy As hydropower responds to a larger share of energy demand dams may also help to reduce the consumption of fossil fuels welcome news in a country where air and water pollution have become dire and greenhouse gas emissions are the highest in the world Yet the advantages of dams come at a high cost for river ecosystems and for the social and economic well being of local people who face displacement and farmland loss This book examines the array of water management decisions faced by Chinese leaders and their consequences for local communities Focusing on the southwestern province of Yunnan a major hub for hydropower development in China which encompasses one of the world's most biodiverse temperate ecosystems and one of China's most ethnically and culturally rich regions Bryan Tilt takes the reader from the halls of decision making power in Beijing to Yunnan's rural villages In the process he examines the contrasting values of government agencies hydropower corporations NGOs and local communities and explores how these values are linked to longstanding cultural norms about what is right proper and just He also considers the various strategies these groups use to influence water resource policy including advocacy petitioning and public protest Drawing on a decade of research he offers his insights on whether the world's most populous nation will adopt greater transparency increased scientific collaboration and broader public participation as it continues to grow economically

**Evaluating Environmental and Social Impact Assessment in Developing Countries** Salim Momtaz, Zobaidul Kabir, 2018-07-17 Evaluating Environmental and Social Impact Assessment in Developing Countries Second Edition outlines an evaluation framework that supports environmental

professionals researchers and academics in evaluating the effectiveness of impact assessment within limited budgets promotes standardization across the field and helps determine if Environmental Impact Assessment EIA is achieving its intended goal of sustainable development Using Bangladesh as a case study the book discusses key processes highlights the need for an integrated holistic approach outlines the current institutional framework and discusses environmental impact social impact community participation and the implementation of mitigation measures This new edition provides a fully updated picture of both recent changes and ongoing development in process such as the growth in social wellbeing community participation and enhanced auditing Finally the challenges still facing EIA and SIA evaluation are addressed as robustly as possible Outlines the latest updates on how EIA and SIA outcome assessment systems are being incorporated Highlights the surge in growth of community participation in EIA and gives valuable insights into the methods and techniques being used to successfully harness this phenomenon Provides updated case studies that demonstrate how the evaluation framework has been applied revealing the challenges changes failures and successes that have taken place on these projects since the first edition

**Tools to Aid Environmental Decision Making** Virginia H. Dale, Mary R. English, 2012-11-26 Environmental decision making is like politics mostly local In fact making decisions about the environment at the subnational level in state regional and local jurisdictions is a lot like politics For resolving environmental issues demands but often resists a balance between deeply held feelings and stark confrontations among opposing views This volume describes tools that should make the decision maker's lot a bit more tolerable The authors would be the last to suggest that these decision aiding tools will somehow bring a benign order to issues that reach to people's fundamental values What they can help do is to keep the debate focused on the important issues to serve up useful options and to narrow the range of disagreement Even this is a challenging assignment Still why bother The chief reason is that the locus of environmental decision making has in the past decade or so shifted from the national to the subnational level a convenient if colorless term to denote the hurly burly of environmental controversy outside the Washington Beltway For example New England has taken a regional stand on tropospheric ozone control and California requires automotive pollution controls that some other jurisdictions have partially adopted This shift is a profound but not unexpected result of the way environmental policy has evolved since the modern environmental movement began around the late 1960s Back then the pendulum was swinging the other way

Gustavson, Richard M. Huber, H. Jack Ruitenbeek, 2000 The applied research indicates that to improve awareness park education programs should be targeted specifically to the user groups primarily through outreach programs Further the Park's management programs should be highlighted particularly the beneficial tangible products and services benefits the Park provides to each user group The closer the tie between reef conditions and business earnings the greater the users support

for reef conservation Coral reefs are sometimes referred to as canaries of the sea because of their early warning ability to show near shore oceanic stress Because of their biological diversity they are also called rainforests of the sea Coral reefs are vital to the well being of millions of people Coral reef managers and government officials trying to save their valuable national resources have turned to research on coral reefs for help The research presented in this publication merits a great deal of notice because the output is useful for decision support and training tools in integrated coastal zone management ICZM The work on cost effectiveness analysis has developed integrated economic and ecological models relying extensively on fuzzy logic procedures to model impacts and effects of interventions within the reef environment By contrast the marine system valuation work provides economic valuations of coral reefs demonstrating the use of different modeling methods and treating key policy issues within this context This publication will interest coastal zone experts and managers worldwide

Thinking about Cultural Resource Management Thomas F. King, 2002 Tom King knows cultural resource management As one of its long standing practitioners a key person in developing the regulations and a consultant trainer and author of several important books on the topic King s ideas on CRM have had a large impact on contemporary practice In this witty sardonic book he outlines ways of improving how cultural resources are treated in America King tackles everything from disciplinary blinders NAGPRA and the National Register to flaws in the Section 106 process avaricious consultants and the importance of meaningful consultation with native peoples This brief work is an important source of new ideas for anyone working in this field and a good starting point for discussion in courses and training programs **Marine Fisheries Review**

, 2009 **Assessing the Social Impact of Development Projects** Hari Mohan Mathur, 2015-12-16 This book shows how social impact assessment SIA which emerged barely five decades ago as a way to anticipate and manage potentially negative social impacts of building dams power stations urban infrastructure highways industries mining and other development projects is now widely in use as a planning tool especially in developed countries Although SIA has still not gained much acceptance among development planners in Asia the situation is gradually changing In India SIA initially mandated as a policy guideline in 2007 is now a legal requirement SIA in China has also recently become obligatory for certain types of development projects Bangladesh Laos Nepal Pakistan and Sri Lanka are other Asian countries that provide examples from a variety of externally funded projects illustrating the use of social impact analysis in project planning to improve development outcomes With contributions from an array of leading experts this book is a valuable resource on SIA indispensable for policymakers planners and practitioners in government international development agencies private sector industry private banks consultants teachers researchers and students of social sciences and development studies also NGOs everywhere not in Asia alone
