Science Interrupted Timothy G. McLellan, 2024-01-15 *Science Interrupted* examines how scientists in China pursue environmental sustainability within the constraints of domestic and international bureaucracies Timothy G McLellan offers a theoretical framework for analyzing the formal procedural work of Chinese bureaucracy work that is overlooked when China scholars restrict their gaze to the informal and interpersonal channels through which bureaucracy is often navigated Homing in on an agroforestry research organization in southwest China the author takes the experiences of the organization s staff in navigating diverse international funding regimes and authoritarian state institutions as entry points for understanding the pervasiveness of bureaucracy in contemporary science He asks What if we take the tools sensibilities and practices of bureaucracies seriously not only as objects of critique but as resources for re thinking scientific practice Extending a mode of anthropological research in which ethnography serves as source of theory as well as source of data *Science Interrupted* thinks with and not only against bureaucracy McLellan shows that ethnographic engagement with bureaucracy enables us to imagine more democratic and more collaborative modes of scientific practice *Queer Interruptions* Evangeline

Aguas, 2025-01-25 This book explores the experiences of queer female and genderqueer fans through interviews and an original documentary Inspired by fan reactions to the death of a popular lesbian character on the television series *The 100* 2014 2020 the book focuses on the fans experiences with the Bury Your Gays trope and seeks to illustrate the enduring impact of these fictional deaths on contemporary viewers The book draws on queer theory to frame the experiences of queer female and genderqueer fans as experiences of queer time as deviations from heteronormative life timelines as anachronistic backward turns and as queer melancholia By exploring the backward feelings and experiences of fans this book illustrates how the pain and abjection of the queer past are still with us in the present challenging simplistic narratives of progress and highlighting the continuing marginalisation of the queer community onscreen and in the wider political context

Multitasking: Executive Functioning in Dual-Task and Task Switching Situations Tilo Strobach, Mike Wendt, Markus Janczyk, 2018-03-27 Multitasking refers to performance of multiple tasks The most prominent types of multitasking are situations including either temporal overlap of the execution of multiple tasks i e dual tasking or executing multiple tasks in varying sequences i e task switching In the literature numerous attempts have aimed at theorizing about the specific characteristics of executive functions that control interference between simultaneously and or sequentially active component of task sets in these situations However these approaches have been rather vague regarding explanatory concepts e g task set inhibition preparation shielding capacity limitation widely lacking theories on detailed mechanisms and or empirical evidence for specific subcomponents The present research topic aims at providing a selection of contributions on the details of executive functioning in dual task and task switching situations The contributions specify these executive functions by focusing on 1 fractionating assumed mechanisms into constituent subcomponents 2 their variations by age or in clinical

subpopulations and or 3 their plasticity as a response to practice and training

Interruptions in Early Modern English Drama Michael M. Wagoner, 2022-09-22 To interrupt both on stage and off is to wrest power From the Ghost's appearance in Hamlet to Celia's frightful speech in Volpone interruptions are an overlooked linguistic and dramatic form that delineates the balance of power within a scene This book analyses interruptions as a specific form in dramatic literature arguing that these everyday occurrences when transformed into aesthetic phenomena reveal illuminating connections between characters between actor and audience and between text and reader Focusing on the works of William Shakespeare Ben Jonson and John Fletcher Michael M Wagoner examines interruptions that occur through the use of punctuation and stage directions as well as through larger forms such as conventions and dramaturgy He demonstrates how studying interruptions may indicate aspects of authorial style emphasizing a playwright's use and control of a text and how exploring relative power dynamics pushes readers and audiences to reconsider key plays and characters providing new considerations of the relationships between Othello and Iago or Macbeth and the Ghost of Banquo

The Interruption of Heteronormativity in Higher Education Michael Seal, 2019-07-29 This book examines how heteronormativity in higher education can be interrupted and resisted Located within the theoretical framework of queer and critical pedagogy and based on extensive empirical research the author explores the dynamics of heteronormativity and its interruption on professional courses in a range of higher education institutions Reactions to attempt to interrupt it were nuanced while strategies of contested engagement avoidance and retreat were expressed heterosexualities were largely unexamined and unarticulated Coming out needs to be a pedagogical act carried out concurrently with the interruptions of other social constructions and binary oppositions The author calls for co created and co held meta reflexive and liminal spaces that emphasise intersubjectivity encounters and working in the moment These spaces must deconstruct and reconstruct pedagogical power and knowledge to promote collective intersubjective consciousnesses and widen the vision of the reflective practitioner to that of the pedagogical practitioner This pioneering book is a call to action to all those concerned with interrupting and problematising presumed binary categories of sexuality within the heterosexual matrix

Learning Technology for Education Challenges Lorna Uden, Dario Liberona, Galo Sanchez, Sara Rodríguez-González, 2019-05-27 This book constitutes the refereed proceedings of the 8th International Workshop on Learning Technology for Education Challenges LTEC 2019 held in Zamora Spain in July 2019 The 41 revised full papers presented were carefully reviewed and selected from 83 submissions The papers are organized in the following topical sections learning technologies learning tools and environment e learning and MOOCs learning practices social media learning tools machine learning and evaluation support programs LTEC 2019 examines how these technologies and pedagogical advances can be used to change the way teachers teach and students learn while giving special emphasis to the

pedagogically effective ways we can harness these new technologies in education

Can the Debt Growth Be Stopped? John Merrifield, Barry W. Poulson, 2016-03-01 This book explores new fiscal rules introduced in OECD countries and the relevance of fiscal rules for the unique fiscal policies and institutions in the United States The rules in different countries are compared with a more in depth analysis of two countries with arguably the most successful fiscal rules Switzerland and Sweden The study compares the challenge of fiscal consolidation facing the U S with that in other OECD countries The centerpiece of the study is analysis of fiscal rules using a dynamic simulation model A Swiss style fiscal rule is compared to an alternative fiscal rule proposed by Representative Amash H J Res 24 The authors propose a new fiscal rule designed for the unique fiscal institutions in the U S Dynamic scoring is used to measure the impact of different fiscal rules on the federal budget economic growth and revenue The effectiveness of the different fiscal rules is analyzed with respect to several criteria A major objective of the rules is fiscal stabilization in the long run to bring debt GDP ratios below tolerance levels The fiscal rules are also designed for budget stabilization in the medium term such that deficits in periods of recession are offset by surplus revenue in periods of economic expansion The concluding section of the study explores the political economy of enacting new fiscal rules in the U S The study proposes fundamental changes in budget process required for the proposed fiscal rule to be effective The study concludes with a discussion of alternative routes to enacting new fiscal rules and the prospects for new fiscal rules to be enacted in the U S

Embedded Systems Design with the Texas Instruments MSP432 32-bit

Processor Dung Dang, Daniel J. Pack, Steven F. Barrett, 2022-06-01 This book provides a thorough introduction to the Texas Instruments MSP432™ microcontroller. The MSP432 is a 32-bit processor with the ARM Cortex M4F architecture and a built-in floating-point unit. At the core, the MSP432 features a 32-bit ARM Cortex M4F CPU, a RISC architecture processing unit that includes a built-in DSP engine and a floating-point unit. As an extension of the ultra-low-power MSP microcontroller family, the MSP432 features ultra-low-power consumption and integrated digital and analog hardware peripherals. The MSP432 is a new member to the MSP family. It provides for a seamless transition to applications requiring 32-bit processing at an operating frequency of up to 48 MHz. The processor may be programmed at a variety of levels with different programming languages, including the user-friendly Energia rapid prototyping platform in assembly language and in C. A number of C programming options are also available to developers, starting with register-level access code where developers can directly configure the device's registers to Driver Library, which provides a standardized set of application program interfaces (APIs) that enable software developers to quickly manipulate various peripherals available on the device. Even higher abstraction layers are also available, such as the extremely user-friendly Energia platform that enables even beginners to quickly prototype an application on MSP432. The MSP432 LaunchPad is supported by a host of technical data, application notes, training modules, and software examples. All are encapsulated inside one handy package called MSPWare, available as both a stand-alone download package as well as on the TI Cloud development site, dev.ti.com. The features of the MSP432 may be extended with a full line of BoosterPack plug-in modules. The MSP432 is also supported by a variety of third-party modular sensors and software compiler companies. In the back, a thorough introduction to the MSP432 line of microcontrollers, programming techniques, and interface concepts are provided, along with considerable tutorial information with many illustrated examples. Each chapter provides laboratory exercises to apply what has been presented in the chapter. The book is intended for an upper-level undergraduate course in microcontrollers or mechatronics but may also be used as a reference for capstone design projects. Practicing engineers already familiar with another microcontroller who require a quick tutorial on the microcontroller will also find this book very useful. Finally, middle school and high school students will find the MSP432 highly approachable via the Energia rapid prototyping system. *We Interrupt This Program* Miranda J. Brady, John M.H. Kelly, 2017-11-01 *We Interrupt This Program* tells the story of how Indigenous people are using media tactics in the realms of art, film, television, and journalism to rewrite Canada's national narratives from Indigenous perspectives. Miranda Brady and John Kelly showcase the diversity of these interventions by offering personal accounts and reflections on key moments: witnessing survivor testimonies at the Truth and Reconciliation Commission; attending the opening night of the ImagineNative Film Media Festival; and discussing representations of Indigenous people with artists such as Kent Monkman and Dana Claxton, and with CBC journalist Duncan McCue. These scene-setting moments bring to life their argument that media tactics as articulations of Indigenous sovereignty have the power not only to effect change from

within Canadian institutions and through established mediums but also to spark new forms of political and cultural expression in Indigenous communities and among Indigenous youth Theoretically sophisticated and eminently readable *We Interrupt This Program* reveals how seemingly unrelated acts by Indigenous activists across Canada are decolonizing our cultural institutions from within one intervention at a time

Postcolonial Interruptions, Unauthorised Modernities

Iain Chambers, 2017-03-01 *Postcolonial Interruptions Unauthorised Modernities* is a ground breaking work that reevaluates the cultural and political understandings of the world today from the perspective of the south Largely located in the Mediterranean and in understandings of a southern question that extends beyond local and national confines the arguments and perspectives proposed seek to explore the historical formation and political configurations of a multiple modernity Drawing upon the interdisciplinary lines of thought developed within cultural and postcolonial studies the work develops a concept of heritage beyond the concerns and obsessions of the Anglo American world It offers a counter hegemony construction of the figure of the migrant and other as a disruptive force in the construction of the idea of the West It proposes a rethinking of the geo political economies of knowledge and power lived and viewed from elsewhere This accessibility written book should be of interest to anyone interested in the construction of modernity and the future of postcolonial studies

Comprehensive Neonatal Nursing Care, Sixth Edition Carole Kenner, Leslie Altimier, Marina V.

Boykova, 2019-08-28 Praise for the Fifth Edition This book provides a complete look at neonatal healthcare delivery It includes discussions of contemporary topics of interest such as informatics genetics global health and family centered care which are vital to providers caring for neonates today The case studies and evidence based practice dialogues provide great opportunities for further reflection The book is useful to a wide audience in nursing including undergraduate and graduate nursing students practicing neonatal and pediatric nurses and advanced practice nurses who care for neonates Score 92 4 Stars Doody's Medical Reviews The sixth edition of this acclaimed neonatal nursing text is completely updated to encompass the most current research findings and strategies for providing cost effective and evidence based care It continues to address neonatal care from a physiologic and pathophysiologic perspective with a major emphasis on nursing management at the bedside and advanced practice level It examines each neonatal body system and describes evidence based interventions that assist in understanding the why behind various clinical presentations Integrative management is threaded throughout the text along with extensive research findings to support practice strategies and rationales for sound clinical decision making Case studies evidence based practice boxes QSEN competencies and online resources help to amplify and reinforce content New to the Sixth Edition New technologies including neonatal health care simulation Trauma Informed Care Substantial revisions to the Neonatal Resuscitation Program Updates in Continuous Quality Improvement Emphasis on neuroprotective factors Emerging global trends Genomics and its relationship to precision health prevention of diseases Maternal Fetal Units Neonatal Abstinence Syndrome and maternal drug use Leadership and cost management of the NICU Updates on neonatal

Troth, Neal M. Ashkanasy, Ronald H. Humphrey, 2023-01-20 Volume 18 of Research on Emotion in Organizations follows the theme of Emotions during Times of Disruption contending that emotions and other affect related concepts represent keys to understanding the phenomena of disruption in organizations more fully *Interrupt Handling Schemes in Operating Systems* Pedro Mejia-Alvarez, Luis Eduardo Leyva-del-Foyo, Arnaldo Diaz-Ramirez, 2018-08-10 In this book the interrupt handling models used by several operating systems are introduced and compared We begin with an analysis of the classical interrupt management model used by Unix followed by the schemes used by modern networked environments We highlight the key challenges of each of these models and how these have been solved by modern operating systems and the research community Then we analyze the architectures used for general purpose and embedded real time operating systems *Agile Scrum Implementation and Its Long-Term Impact on Organizations* Walsh, Kenneth R., Mahesh, Sathiadev, Trumbach, Cherie C., 2020-08-21 Software engineering has surfaced as an industrial field that is continually evolving due to the emergence of advancing technologies and innovative methodologies Scrum is the most recent revolution that is transforming traditional software procedures which has researchers and practitioners scrambling to find the best techniques for implementation The continued development of this agile process requires an extensive level of research on up to date findings and applicable practices Agile Scrum Implementation and Its Long Term Impact on Organizations is a collection of innovative research on the methods and applications of scrum practices in developing agile software systems The book combines perspectives from both the academic and professional communities as the challenges and solutions expressed by each group can create a better understanding of how practice must be applied in the real world of software development While highlighting topics including scrum adoption iterative deployment and human impacts this book is ideally designed for researchers developers engineers practitioners academicians programmers students and educators seeking current research on practical improvements in agile software progression using scrum methodologies *Augmentation of Brain Function: Facts, Fiction and Controversy* Ioan Opris, Manuel F. Casanova, Mikhail Lebedev , 2018-09-14 The Volume II is entitled Neurostimulation and pharmacological approaches This volume describes augmentation approaches where improvements in brain functions are achieved by modulation of brain circuits with electrical or optical stimulation or pharmacological agents Activation of brain circuits with

electrical currents is a conventional approach that includes such methods as i intracortical microstimulation ICMS ii transcranial direct current stimulation tDCS and iii transcranial magnetic stimulation TMS tDCS and TMS are often regarded as noninvasive methods Yet they may induce long lasting plastic changes in the brain This is why some authors consider the term noninvasive misleading when used to describe these and other techniques such as stimulation with transcranial lasers The volume further discusses the potential of neurostimulation as a research tool in the studies of perception cognition and behavior Additionally a notion is expressed that brain augmentation with stimulation cannot be described as a net zero sum proposition where brain resources are reallocated in such a way that gains in one function are balanced by costs elsewhere In recent years optogenetic methods have received an increased attention and several articles in Volume II cover different aspects of this technique While new optogenetic methods are being developed the classical electrical stimulation has already been utilized in many clinically relevant applications like the vestibular implant and tactile neuroprosthesis that utilizes ICMS As a peculiar usage of neurostimulation and pharmacological methods Volume II includes several articles on augmented memory Memory prostheses are a popular recent development in the stimulation based BMIs For example in a hippocampal memory prosthesis memory content is extracted from hippocampal activity using a multiple input multiple output non linear dynamical model As to the pharmacological approaches to augmenting memory and cognition the pros and cons of using nootropic drugs are discussed

Handbook of Human Multitasking Andrea Kiesel, Leif Johannsen, Iring Koch, Hermann Müller, 2022-09-12 This handbook on human multitasking provides an integrative overview on simultaneous and sequential multitasking and thus combines theorizing on dual task limitations as well as costs related to task switching In addition to a wide range of empirical findings and their theoretical integration the editors provide a number of applications of multitasking like training interindividual differences and applied research in traffic and health psychology and music expertise The book is suitable for people interested in multitasking that is for researchers and graduate students of cognitive psychology movement science sport psychology cognitive neuroscience cognitive and neurological rehabilitation aging sciences and broader cognitive science

Handbook on Insurance Coverage Disputes, 19th Edition Ostrager, Newman, 2018-12-15

Handbook on Insurance Coverage Disputes Sounding Bodies Ann Cahill, Christine Hamel, 2021-08-26 In compelling and intricately argued ways the authors make a resounding case for understanding how vocal sonority is intrinsic to self identity and self reception Required Reading Jane Boston Principal Lecturer Voice Studies Royal Central School of Speech and Drama A new provocative study of the ethical political and social meanings of the everyday voice Utilising the framework of feminist philosophy authors Ann J Cahill and Christine Hamel approach the phenomenon of voice as a lived sonorous and embodied experience marked by the social structures that surround it including systemic forms of injustice such as ableism sexism racism and classism By developing novel theoretical constructs such as intervocality and respiratory responsibility Cahill and Hamel cut through the static between theory and praxis and put forward exciting theories on how human vocal sound can

perpetuate and challenge persistent inequalities *Sounding Bodies* presents a powerful model of how the seemingly disparate disciplines of philosophy and voice speech training can in conversation with each other generate illuminating insights about our vocal lives and identities
