The research presented aims to gain a better understanding of what computation is to find better models of computation and to look for new computing devices inspired by the structure and/or functioning of natural or societal systems. The papers are preceded by an introduction by Solomon Marcus, Gheorghe Păun's lifelong teacher and mentor, and are organized in topical sections on general computing, grammar systems, membrane systems, and inspirations from natural computing. Annual Review of Information Science and Technology Blaise Cronin, 2004 ARIST published annually since 1966 is a landmark publication within the information science community.
