codes for modeling contaminant transport in subsurface media It also serves as a textbook for senior and graduate course on reactive chemical transport in subsurface media in disciplines such as civil and environmental engineering agricultural engineering geosciences soil sciences and chemical engineering Computational Subsurface Hydrology Reactions Transport and Fate presents a systematic derivation of governing equations and boundary conditions of subsurface contaminant transport as well as reaction based geochemical and biochemical processes It discusses a variety of numerical methods for moving sharp front problems expounds detail procedures of constructing Lagrangian Eulerian finite element methods and describes precise implementation of computer codes as they are applied to subsurface contaminant transport and biogeochemical reactions
