

ROLLS ROYCE KAMEWA WATERJET OPERATORS MANUAL

By Antoine Capstick

Foreword

- I wrote this manual as an aid to the yacht Captain who is presented with the opportunity to work aboard a Rolls Royce Kamewa waterjet boat but whose experience does not include this system of propulsion and steering. Volume two will cover the Hamilton version of the same system.
- This manual is intended as an aid to on the bridge tuition and does not replace the need for additional expertise in the early stages of maneuvering waterjet boats. The peace of mind to owners, managers and Captains of an extra, experienced pair of hands on the bridge for one or two days is well worth the cost, especially against the likelihood of collision, "hard landings" and damage to the yacht brought about by inexperienced handling of an unfamiliar and counterintuitive system.
- My first season driving waterjets was beset with the frustration of trial and error maneuvers and fear of strong crosswinds. I made mistakes by turning the jets the wrong way, confusing towed in with towed out nozzle positions. The lack of formal training only added to the pressure.
- This manual includes techniques including moving the boat sideways without using a bow thruster, simple turns, how to check the hydraulic system, what the alarms mean and a page devoted to common mistakes, all of which I have made at least twice!
- Had I had access to this information when I started, my early maneuvers would have been more polished, and less worry would have been caused to neighboring yachts in such ports as St Tropez, Cervo, Cannes and Monaco where the sheer volume of spectators, owners friends etc makes it important to get it right first time, every time, if only for the pride of the owner, crew and captain.
