Alex L. Goldfayn, 2012-01-03 In **Evangelist Marketing** Alex Goldfayn argues that technology companies succeed in spite of their marketing not because of it He says that if consumer tech makers ceased all marketing activity today they would not see a significant decline in sales In this book Alex presents why the current state of overly technical features oriented tech marketing branding communications and public relations is costing the industry billions of dollars easy money that s voluntarily being left on the table Then he lays out a step by step system for creating intensely loyal brand evangelists based on deep consumer insights and simple emotional language **Evangelist Marketing** is written for consumer tech companies big and small from PC manufacturers to Web based services It s also sure to improve the work of their marketing and public relations agencies **High Dynamic Range Video** Karol Myszkowski, Rafal Mantiuk, Grzegorz Krawczyk, 2022-05-31 As new displays and cameras offer enhanced color capabilities there is a need to extend the precision of digital content High Dynamic Range HDR imaging encodes images and video with higher than normal 8 bit per color channel precision enabling representation of the complete color gamut and the full visible range of luminance However to realize transition from the traditional to HDR imaging it is necessary to develop imaging algorithms that work with the high precision data To make such algorithms effective and feasible in practice it is necessary to take advantage of the limitations of the human visual system by aligning the data shortcomings to those of the human eye thus limiting storage and processing precision Therefore human visual perception is the key component of the solutions we discuss in this book This book presents a complete pipeline for HDR image and video processing from acquisition through compression and quality evaluation to display At the HDR image and video acquisition stage specialized HDR sensors or multi exposure techniques suitable for traditional cameras are discussed Then we present a practical solution for pixel values calibration in terms of photometric or radiometric quantities which are required in some technically oriented applications Also we cover the problem of efficient image and video compression and encoding either for storage or transmission purposes including the aspect of backward compatibility with existing formats Finally we review existing HDR display technologies and the associated problems of image contrast and brightness adjustment For this purpose tone mapping is employed to accommodate HDR content to LDR devices Conversely

the so called inverse tone mapping is required to upgrade LDR content for displaying on HDR devices We overview HDR enabled image and video quality metrics which are needed to verify algorithms at all stages of the pipeline Additionally we cover successful examples of the HDR technology applications in particular in computer graphics and computer vision The goal of this book is to present all discussed components of the HDR pipeline with the main focus on video For some pipeline stages HDR video solutions are either not well established or do not exist at all in which case we describe techniques for single HDR images In such cases we attempt to select the techniques which can be extended into temporal domain Whenever needed relevant background information on human perception is given which enables better understanding of the design choices behind the discussed algorithms and HDR equipment Table of Contents Introduction Representation of an HDR Image HDR Image and Video Acquisition HDR Image Quality HDR Image Video and Texture Compression Tone Reproduction HDR Display Devices LDR2HDR Recovering Dynamic Range in Legacy Content HDRI in Computer Graphics Software

**Designing for Small Screens** Studio 7.5,2005-10 The design of interactive applications or presentations on small screens can be challenging for the designer Not all design concepts that are valid on larger screens can be implemented on the small screen A multitude of different devices with dissimilar technical specifications fall under the category of small screen interfaces Devices in this category differ in size and type of their display in the nature of their physical interaction and in their performance This book equips the student or practitioner with the appropriate tools with which to develop functional concepts and realise good designs for small screens In order to tackle and visualise complex design issues each of the ten chapters in this book is structured in three segments The first section is dedicated to theoretical reflection and an overview of the fundamental design options that relate to the specific issue in question The second section offers examples of good working practice and application of the theory described and the final section offers useful background information such as an explanation of the technical terms that will help you to make informed design decisions Selling points shows professional designers and students how to develop functional concepts and good design for the small screen and pertinent subject given advancing technology in mobile phones palm top computers and other small screen devices Readership both professional designers and students alike Authors Professor Carola Zwick studied at the University of Arts Berlin where she gained an MA in Industrial Design In 1993 she joined the teaching body at the University of Arts Berlin as an Assistant Professor and together with Burkhard Schmitz she initiated the media group ID 5 within the design course Carola Zwick has been teaching interface design at the University of Applied Sciences Magdeburg Stendal since 1998 Professor Burkhard Schmitz studied at the University of Arts in Berlin where he too gained an MA in Industrial Design In 1989 he became Professor for Media Design at the University of Applied Sciences Schwabisch Gmund In 1993 he returned once more to the University of Arts Berlin where he has taught Interactive Systems since Dipl Designer Kerstin Kuhl studied at the University of Applied Sciences Dessau where she gained a diploma in Graphic Design      **Displays** Rolf R.
