The Tragedy of American Science Clifford D. Lange, Valerie Antoine, 1974 **Technical Abstract Bulletin** , The Life and Times of A D Blumlein R. W. Burns, 2000

Despite his accidental death in June 1942 at the age of 38 Alan Dower Blumlein was unquestionably one of the century's most creative engineers and filed some 140 patents. He was the driving force and inspiration behind a vast number of fundamental innovations in the fields of radar electronics and sound recording amongst which he held perhaps the landmark patent enabling stereo sound. Surprisingly until 1999 there had been no biographies of this remarkable man. The IEE is proud to rectify this by publication of this scholarly treatment of Blumlein's life which includes a foreword by his eldest son **The Rocket Lab** Michael G. Smith, 2023-05-15. The Rocket Lab Maurice Zucrow Purdue University and America's Race to Space focuses on the golden era of space exploration between 1946 and 1966 specifically the life and times of Purdue University's Dr Maurice J Zucrow a pioneering teacher and researcher in aerospace engineering. Zucrow taught America's first university course in jet and rocket propulsion wrote the field's first textbook and established the country's first educational Rocket Lab. He was part of a small circle of innovators who transformed Purdue into the country's largest engineering university which became a cradle of astronauts. Taking a chronological and thematic approach The Rocket Lab weaves between the local and national drawing in rival universities especially Harvard MIT Princeton and Caltech. Also covered is Zucrow's role in the national project system of research and development through World War II and the Cold War. At Aerojet he was one of the country's original project engineers dedicated to scientific technical expertise and the stepwise approach. He made vanguard power plant contributions to the Northrop Flying Wing as well as the Corporal Nike and Atlas missiles among others. Zucrow's work in propulsion helped to improve the country's arsenal of ballistic missiles and space launchers and as a teacher he educated the first generation of aerospace engineers. This book elevates Zucrow and the central role he played in getting the United States to space.
