The six individual cylinder heads are of cast iron, each fixed to the crankcase with four stretch-shank bolts. The package of design and technology measures already present in the 60/500 engine model series has been carried over for the cylinder heads of this model series, in order to meet the EURO III Standards. The 6-hole injection nozzles are located centrally in the combustion chamber. Two intake and outlet valves are arranged symmetrically around each of these, so that the optimal conditions are present for gas exchange that is rapid and as complete as possible. This has a positive effect on fuel consumption and exhaust gas composition. The valves are controlled from the camshaft through pairs of push rods, rocker arms and valve bridges.
