Anne Carson: Antiquity Laura Jansen, 2021-10-07 From her seminal *Eros the Bittersweet* 1986 to her experimental *Float* 2016 *Bakkhai* 2017 and *Norma Jeane Baker of Troy* 2019 Anne Carson's engagement with antiquity has been deeply influential to generations of readers both inside and outside of academia One reason for her success is the versatile scope of her classically oriented oeuvre which she rethinks across multiple media and categories Yet an equally significant reason is her profile as a classicist In this role Carson unfailingly refuses to conform to the established conventions and situated practices of her discipline in favour of a mode of reading classical literature that allows for interpretative and creative freedom From a multi praxis cross disciplinary perspective the volume explores the erudite indiscipline of Carson's classicism as it emerges in her poetry translations essays and visual artistry It argues that her classicism is irreducible to a single vision and that it is best approached as integral to the protean character of her artistic thought Anne Carson Antiquity collects twenty essays by poets translators artists practitioners and scholars It offers the first collective study of the author's classicism while drawing attention to one of the most avant garde multifaceted readings of the classical past

Cities of Light and Heat Mark H. Rose, 1995-01-01 *Cities of Light and Heat* takes us to Kansas City and Denver during the late nineteenth century when gas and electricity were introduced to these instant cities of the west With rich detail Mark Rose shows how the new technology spread during the next century from a few streets and businesses within the city limits to countless private homes in the suburbs In Kansas City and Denver as in most communities throughout the U S business executives city leaders and engineers acted as early promoters of the new technology But by the early 1900s educators home builders architects and salespersons were becoming increasingly important as gas and electric utilities and appliances reached more and more

American homes But these voices for the new technology brought with them their own social attitudes and cultural values By mid century whether in the classroom or in advertisements Americans were regularly encouraged to fit the new technology within prevailing notions of cleanliness comfort convenience and gender Although in hindsight the spread of modern technology might seem inevitable to us Rose shows how even the leaders of the nation s great gas and electric corporations with their vast production and distribution facilities were subject to geography competing ideologies urban politics and even the choices of ordinary consumers Rose thus locates the driving force behind the diffusion of technology in the neighborhoods kitchens and offices of the city Cities of Light and Heat shows the importance of culture politics and urban growth in shaping technological change in the cities of North America **Microwave Heating** David A.
