The Dark Side of Leadership Dr Tessie Herbst, 2014-03-28 This book highlights the fact that leaders do indeed affect the performance of organizations or the well being of society for better or worse to cast either a shadow or light by the exercise of their leadership Modern psychology with its theories of human behavior which does not acknowledge the existence of the spiritual realm cannot explain the carnage and evil often associated with the dark side of leadership This book focuses on the dark side of leadership in a multidimensional manner and provides a psychospiritual

approach toward understanding personality disorders and leader derailment It highlights an area that has not been widely studied by leadership researchers to date the dynamic relationship between the psychological and spiritual domains in shaping the dark side which lead to leadership failure and derailment This book calls for a more interdisciplinary approach and holistic understanding of the dark side of leadership inseparably relating body soul and spirit as they function individually and relationally It highlights the fact that the restoration of personality will require sustained dialogue between theologians and the medical and psychological professions Such a theoretical perspective would help us better understand how personality disorders develop not only emotionally and psychologically but spiritually

Emotional First Aid on the Job Harry Levinson, National Association for Mental Health (U.S.), 1957* *Psychological First Aid*, 2014 The field of mental health has changed from a deficit model to a strength model And that s what psychological first aid does It says that we don t have to look at the deficits and dysfunctions Instead we should look at the strengths that the individual has and build on them Chris Dunning PhD Many mental health professionals volunteer their time as first responders in the wake of large scale disasters All too often they ve found that their clinical training and therapeutic instincts don t fully apply to the circumstances in which they find themselves and may actually render them less effective It was in response to this problem that the psychological first aid model was developed In this video series leading researchers share the model they ve helped create one that designed to provide the tools and guidance necessary for clinicians to respond appropriately to the often overwhelming needs of disaster survivors The observations of the theorists are complemented by interviews with first responders whose assignments have taken them to New York after 9 11 the Superdome after Katrina and Haiti after its earthquake First person accounts from survivors of a California firestorm also are included Presenters include Patricia Watson Josef Ruzek Chris Dunning Charles Figley and John Violanti
