Human Factors in Transportation Giuseppe Di Bucchianico, Andrea Vallicelli, Neville A. Stanton, Steven J. Landry, 2016-09-19 More and more the most traditional and typical applied ergonomics issues of the activities related to sea shipping vehicle driving and flying are required to deal with some emerging topics related to the growing automatism and manning reduction the ICT's advances and pervasiveness and the new demographic and social phenomena such as aging or multiculturalism With contributions from expert researchers professionals and doctoral students from a wide number of countries such as Australia Austria Canada Italy Germany the Netherlands Norway Sweden UK and USA this multi contributed book will explore traditional and emerging topics of Human Factors centered around the maritime road rail and aviation transportation domains

Advances in Human Aspects of Transportation: Part III Neville Stanton, Steven Landry, Giuseppe Di Bucchianico, Andrea Vallicelli, 2022-07-19 Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation awareness skill development and training warnings and workload This book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection

of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system

Handbook of Web Based Energy Information and Control Systems Barney L. Capehart,Timothy Middelkoop,2020-12-22 This book promotes the benefits of the development and application of energy information and control systems This wave of information technology IT and web based energy information and control systems web based EIS ECS continues to roll on with increasing speed and intensity This handbook presents recent technological advancements in the field as well as a compilation of the best information from three previous books in this area The combined thrust of this information is that the highest level functions of the building and facility automation system are delivered by a web based EIS ECS system that provides energy management facility management overall facility operational management and ties in with the enterprise resource management system for the entire facility or the group of facilities being managed
