Schrijver, George L. Siscoe, 2010-05-06 Heliophysics is a fast developing scientific discipline that integrates studies of the Sun
s variability the surrounding heliosphere and the environment and climate of planets The Sun is a magnetically variable star
and for planets with intrinsic magnetic fields planets with atmospheres or planets like Earth with both there are profound
consequences This 2010 volume the second in this series of three heliophysics texts integrates the many aspects of space
storms and the energetic radiation associated with them from causes on the Sun to effects in planetary environments It
reviews the physical processes in solar flares and coronal mass ejections interplanetary shocks and particle acceleration and
transport and considers many space weather responses in geospace In addition to its utility as a textbook it also constitutes a
foundational reference for researchers in fields from heliophysics to climate science Additional online resources including
