Vital Strife Benjamin C. Parris, 2022-08-15 Vital Strife examines the close yet puzzling relationship between sleep and ethical care in early modernity The plays poems and philosophical essays at the heart of this book by Jasper Heywood William Shakespeare Edmund Spenser John Milton and Margaret Cavendish explore the unconscious motions of corporeal life and the drowsy forms of sentience at the boundaries of human thought and intentionality Benjamin Parris shows how these writers although trained under the Renaissance humanist paradigm of attentive care begin to dissolve the humanist coupling of virtue with vigilance by giving credence to the vital power of sleep In contrast to humanist thinkers who equated sleep with carelessness these writers draw on the ancient Stoic principle of oikei sis the process of orienting the living being toward its proper objects of care beginning with

itself in asserting the value of sleep while underscoring insomnia's threat to the ethical flourishing of persons and polity alike Parris offers an important revaluation of Stoic philosophy which has too often been misconstrued as renouncing feeling and sympathetic connection with others With its striking new account of the reception of Stoicism and attitudes toward sleep and sleeplessness in early modern thought *Vital Strife* reveals the period's mounting concern with the regenerative nature of physical life and its elaboration of a newfound ethics of care

[Forming Sleep](#) Nancy L. Simpson-Younger, Margaret Simon, 2020-04-22 *Forming Sleep* asks how biocultural and literary dynamics act together to shape conceptions of sleep states in the early modern period Engaging with poetry drama and prose largely written in English between 1580 and 1670 the essays in this collection highlight period discussions about how seemingly insentient states might actually enable self formation Looking at literary representations of sleep through formalism biopolitics Marxist theory trauma theory and affect theory this volume envisions sleep states as a means of defining the human condition both literally and metaphorically The contributors examine a range of archival sources including texts in early modern faculty psychology printed and manuscript medical treatises and physicians notes and printed ephemera on pathological sleep through the lenses of both classical and contemporary philosophy Essays apply these frameworks to genres such as drama secular lyric prose treatise epic and religious verse Taken together these essays demonstrate how early modern depictions of sleep shape and are shaped by the philosophical medical political and above all formal discourses through which they are articulated With this in mind the question of form merges considerations of the physical and the poetic with the spiritual and the secular highlighting the pervasiveness of sleep states as a means by which to reflect on the human condition In addition to the editors the contributors to this volume include Brian Chalk Jennifer Lewin Cassie Miura Benjamin Parris Giulio Pertile N Amos Rothschild Garret A Sullivan Jr and Timothy A Turner
