Handbook Of Psychology And Diabetes:

Handbook of Psychology and Diabetes Clare Bradley,1994 This Handbook fulfils a pressing need within the area of psychological measurement in diabetes research and practice by providing access to material which has either been widely dispersed through the psychological and medical literature or has not previously been published Journal articles describing the psychometric development of scales have rarely included the scales themselves but this book includes copies of scales and a wealth of additional information from unpublished theses reports and recent manuscripts You will find information about the reliability validity scoring norms and use of the measures in previous research presented in one volume The Handbook is designed to help researchers and clinicians To select scales suitable for their purposes To administer and score the scales correctly To interpret the results appropriately Dr Clare Bradley is Reader in Health Psychology and Director of the Diabetes Research Group at Royal Holloway University of London Dr Bradley and her research group have designed developed and used a wide variety of measures of psychological processes and outcomes Many of these measures have been designed and developed specifically for people with diabetes Together with diabetes specific psychological measures developed by other researchers internationally these instruments have played an important part in facilitating patient centred approaches to diabetes research and clinical practice *Handbook of Psychology and Diabetes* Clare Bradley,2013-10-31 This Handbook fulfils a pressing need within the area of psychological measurement in diabetes research and practice by providing access to material which has either been widely dispersed through the psychological and medical literature or has not previously been published Journal articles describing the psychometric development of scales have rarely included the scales themselves but this book includes copies of scales and a wealth of additional information from unpublished theses reports and recent manuscripts You will find information about the reliability validity scoring norms and use of the measures in previous research presented in one volume The Handbook is designed to help researchers and clinicians To select scales suitable for their purposes To administer and score the scales correctly To interpret the results appropriately Dr Clare Bradley is Reader in Health Psychology and Director of the Diabetes Research Group at Royal Holloway University of London Dr Bradley and her research group have designed developed and used a wide variety of measures of psychological processes and outcomes Many of these measures have been designed and developed specifically for people with diabetes Together with diabetes specific psychological measures developed by other researchers internationally these instruments have played an important part in facilitating patient centred approaches to diabetes research and clinical practice Handbook of Psychology and Diabetes Clare Bradley,1994 *The Primary Care Toolkit* Larry James,William O'Donohue,2008-12-16 Integrated care is receiving a lot of attention from clinicians administrators policy makers and researchers Given the current healthcare crises in the United States where costs quality and access to care are of particular concern many are looking for new and better ways of delivering behavioral health services Integrating

behavioral health into primary care medical settings has been shown to 1 produce healthier patients 2 produce medical savings 3 produce higher patient satisfaction 4 leverage the primary care physician's time so that they can be more productive and 5 increase physician satisfaction For these reasons this is an emerging paradigm with a lot of interest and momentum For example the President's New Freedom Commission on Mental Health has recently endorsed redesigning the mental health system so that much of this is integrated into primary care medicine

Quality of Life in Child and Adolescent Illness Hans Koot, Jan Wallander, 2014-01-14 How can we measure the quality of life in children and adolescents with chronic disease Major progress in the diagnosis and treatment of severe and chronic disease has led to an increased number of children and their families having to adapt and cope with the impact of disease survival and the cost of treatment Health professionals have responded to this by developing a diversity of instruments for measuring quality of life for use in paediatrics psychology and public health This book introduces the reader

to the emerging field of quality of life assessment and provides a comprehensive overview of the conceptual and methodological issues concerning quality of life in child and adolescent illness. Particular emphasis is provided on current efforts to measure the impact of specific chronic conditions on different domains of child functioning. Future directions are outlined for the development of appropriate instruments for measuring quality of life in children and adolescents. *Quality of Life in Child and Adolescent Illness* is intended for psychologists, paediatricians, paediatric nurses, child psychiatrists, public health professionals, researchers and other interested readers from the undergraduate to the working professional.

Therapeutic Outcome of Endocrine Disorders Brian Stabler, Barry B. Bercu, 2012-12-06. Changes in the allocation of healthcare resources have raised issues related to the efficacy and outcomes of medical therapy and how such factors may be measured. The questions associated with the quality of life and functional capability of patients with chronic health conditions have been of special interest. Endocrine disorders have the potential for disrupting the general health and well being of affected individuals and their families; thus they warrant serious attention. This symposium was convened in November 1997 at Palm Beach Gardens, Florida, to bring together medical, behavioral and social scientists. The meeting fostered the presentation and discussion of the most current clinical research on the effects of various therapies on a wide range of endocrine disorders from diabetes to adrenal insufficiency and growth hormone deficiency. The participants all noted national and international experts in their fields focused their attention on both the biomedical value and effectiveness of treatment as well as on the impact such treatments have on psychological states such as mood and cognition. Many presentations specifically emphasized the quality of life (QOL) indicators that now regularly appear in many research protocols and reports. The pioneering work of two clinical researchers was a major highlight of the meeting and an Award of Recognition was presented to Robert Blizzard M.D. and John Money Ph.D. for their innovative and insightful work in pediatric endocrinology and psychosexual development.

Perceptions of Health and Illness Keith J. Petrie, John Weinman, 1997. The study of how individuals perceive and make sense of health and illness is a new and rapidly developing area in health psychology. The field has undergone important recent theoretical developments and applications to a wide range of health threats and illnesses. The first section of this book examines current theoretical and measurement issues in the field and includes issues related to illness perceptions across the life span, disability and the assessment of illness representations in chronic illness. The second section addresses the role of illness perceptions in health screening and prevention and includes work on perceptions of genetic disease, cancer screening and how individuals process health risk information. The third section is concerned with the application of illness perceptions to patients with chronic illness and those undergoing treatment. Illnesses examined using this approach include chronic fatigue syndrome, breast cancer, diabetes and myocardial infarction.
