Resources in Education, 1995 *The American Biology Teacher*, 2007 **Cumulated Index Medicus**, 1999 *The Feathered World*, 1928 *California Fruit News*, 1911 *Mental Imagery* Joel Pearson, Stephen M. Kosslyn, Our ability to be conscious of the world around us is often discussed as one of the most amazing yet enigmatic processes under scientific investigation today However our ability to imagine the world around us in the absence of stimulation from that world is perhaps even more amazing This capacity to experience objects or scenarios through imagination that do not necessarily exist in the world is perhaps one of the fundamental abilities that allows us successfully to think about plan run a dress rehearsal of future events re analyze past events and even simulate or fantasize abstract events that may never happen Empirical research into mental imagery has seen a recent surge due partly to the development of new neuroscientific methods and their clever application but also due to the increasing discovery and application of more objective methods to investigate this inherently internal and private process As the topic is cross hosted in *Frontiers in Perception Science* and *Frontiers in Human Neuroscience* we invite researchers from different fields to submit opinionated but balanced reviews new empirical theoretical philosophical or technical papers covering any aspect of mental imagery In particular we encourage submissions focusing on different sensory modalities such as olfaction audition somatosensory etc Similarly we support submissions focusing on the relationship between mental imagery and other neural and cognitive functions or disorders such as visual working memory visual search or disorders of anxiety Together we hope that collecting a group of papers on this

research topic will help to unify theory while providing an overview of the state of the field where it is heading and how mental imagery relates to other cognitive and sensory functions

Frontiers in Public Health: Editor's pick 2022-23 Paolo Vineis, 2024-11-01 Welcome to our Editor's Pick collection for Frontiers in Public Health showcasing a curated selection of the most impactful and innovative articles in the field. These articles were specially hand-picked by our Field Chief Editor Professor Paolo Vineis of Imperial College London. This compilation highlights the breadth and depth of contemporary public health research featuring studies that address pressing global health challenges and propose practical solutions. We have categorized the selected articles into 8 categories for ease of readership: Aging and Chronic Diseases, Child and Maternal Health, Environmental Health and Climate Change, Infectious Diseases, Implementation Science and Experimental Studies, Health Inequalities and Social Determinants of Health, Mental Health and Emerging Public Health Issues. Each chosen article not only advances scientific understanding but also underscores the importance of evidence-based practices and policies in improving population health. We are proud to present this diverse array of research that not only reflects the current state of the field but also aims to inspire further inquiry and innovation. 2022 and 2023 were landmark years for the journal which saw tremendous growth and interest in open access. Our goal is to spotlight the exceptional work of our authors, foster readership and innovation through our open access principles and extend our gratitude to our Editorial Board for their persistent dedication and teamwork.

Adolescence Mental Health in School and University Iman Permana, Herni Susanti, 2024-07-29 A school, whether run by the government or a private institution, is established to prepare adolescents for adulthood. In some regions, some religious societies have established a comprehensive educational institution supported by their religious competencies requirement in their curriculum along with the national curriculum. Adolescence is a period of life that ranges from 10 to 19 years old and expands from school to the early phase of university. Adolescents are considered highly susceptible to mental health issues. Anxiety, depression, behavioral disorders, and suicidal attempts have been shown to increase before the age of 24. There is a myriad of factors that can contribute to the development of mental health disorders in this context, including family parenting style and bullying from peers and teachers. Failing to address contributing factors may hinder adolescents from fulfilling and sustaining healthy and productive adult lives.
