Added Value of 3D Imaging in the Diagnosis and Prognostication of Patients with Right Ventricular Dysfunction Attila Kovacs,2024-01-24 Right ventricular RV function has proven to be a

prognostic factor in heart failure with reduced and preserved left ventricular ejection fraction or in pulmonary arterial hypertension RV function is also a cornerstone in managing relatively novel clinical issues such as mechanical circulatory support devices or grown up congenital heart diseases Despite the notable amount of circumferentially oriented myofibers in the subepicardial layer of the RV myocardium the non longitudinal motion directions are often neglected in the everyday assessment of RV function The complex RV contraction pattern however incorporates distinct mechanical components 3D imaging may enable capturing subtle RV dysfunction which can be undetectable by conventional methods Novel 3D based parameters may allow an earlier diagnosis and better risk stratification of numerous cardiac and primarily non cardiac diseases

Radeva, Andres Santos, Monica Hernandez, 2005-06-13 The 1st and 2nd International Conferences on Functional Imaging and Modelling of the Heart FIMH were held in Helsinki Finland in November 2001 and in Lyon France in June 2003 These meetings were born through a fruitful scientific collaboration between France and Finland that outreached to other groups and led to the start of this biennial event The FIMH conference was the first attempt to agglutinate researchers from several complementary but often isolated fields cardiac imaging signal and image processing applied mathematics and physics biomedical engineering and computer science cardiology radiology biology and physiology In the first two editions the conference received an enthusiastic acceptance by experts of all these communities FIMH was originally started as a European event and has increasingly attracted more and more people from the US and Asia This edition of FIMH received the largest number of submissions so far with a result of 47 papers being accepted as either oral presentations or posters There were a number of submissions from non EU institutions which confirms the growing interest in this series of meetings All papers were reviewed by up to four reviewers The accepted contributions were organized into 8 oral sessions and 3 poster sessions complemented by a number of invited talks This year we tried to allocate as many papers as possible as oral presentations to facilitate more active participation and to stimulate multidisciplinary discussions
