

Krystal Clear

Sand Filter Pump & Saltwater System™

2,650GPH

For Above Ground Pools from 4,500 to 15,000 Gallon Capacity

ENJOY THE SAME PROCESS USED IN MANY RESORTS AND IN-GROUND SWIMMING POOLS TO KEEP YOUR POOL SPARKLING CLEAR WITH LESS MAINTENANCE!

HOW THE SYSTEM WORKS:

When the salt water system is installed, a measured quantity of salt is added and dissolved in the pool water. The salt concentration required is only a tenth of the salt concentration of sea water, so swimmers won't perceive salt in the pool water: no smell, just clean, fresh and sparkling pool water.

As the filter pump is circulating pool water during daily filtration, the saline water passes through the salt water system that converts the dissolved salt into sodium hypochlorite, which destroys contaminants such as bacteria and algae, leaving the pool water sanitized.

After sanitizing, sodium hypochlorite converts back into salt, thus repeating the process when passing through the salt water system again for continuous sanitation. Since salt does not evaporate, it doesn't get depleted, and no salt needs to be added, unless enough water was splashed out of the pool during use. When water evaporates, simply add more water – the salt level will remain the same. The system's monitoring system will alert whenever an adjustment is needed.
