

4. In a particular system of units, a physical quantity can be expressed in terms of the electric charge e , electron mass m_e , Planck's constant h , and Coulomb's constant $k = \frac{1}{4\pi\epsilon_0}$, where ϵ_0 is the permittivity of vacuum. In terms of these physical constants, the dimension of the magnetic field is $[B] = [e]^\alpha [m_e]^\beta [h]^\gamma [k]^\delta$. The value of $\alpha + \beta + \gamma + \delta$ is _____.

Answer (4)

Sol. $[B] = [e]^\alpha [m_e]^\beta [h]^\gamma [k]^\delta$

$$[M^1 T^{-2} I^{-1}] = [IT]^\alpha [M]^\beta [ML^2 T^{-1}]^\gamma [ML^3 T^{-4}]^\delta$$

$$\text{So, } \beta + \gamma + \delta = 1 \quad \dots(i)$$

$$2\gamma + 3\delta = 0 \quad \dots(ii)$$

$$\alpha - \gamma - 4\delta = -2 \quad \dots(iii)$$

$$\alpha - 2\delta = -1 \quad \dots(iv)$$

On solving

$$\text{so, } \alpha + \beta + \gamma + \delta = 4$$

5. Consider a configuration of n identical units, each consisting of three layers. The first layer is a column of air of height $h = \frac{1}{3}$ cm, and the second and third layers are of equal thickness $d = \frac{\sqrt{3}-1}{2}$ cm, and refractive indices $\mu_1 = \sqrt{\frac{3}{2}}$ and $\mu_2 = \sqrt{3}$, respectively. A light source Q is placed on the top of the first unit, as shown in the figure. A ray of light from Q is incident on the second layer of the first unit at an angle of $\theta = 60^\circ$ to the normal. For a specific value of n , the ray of light emerges from the bottom of the configuration at a distance $l = \frac{8}{\sqrt{3}}$ cm, as shown in the figure. The value of n is _____.

Isa Paper 2 Physics:

Instrumentation: A Reader R. Loxton, P. Pope, 2012-12-06 This book contains a selection of papers and articles in instrumentation previously published in technical periodicals and journals of learned societies Our selection has been made to illustrate aspects of current practice and applications of instrumentation The book does not attempt to be encyclopaedic in its coverage of the subject but to provide some examples of general transduction techniques of the sensing of particular measurands of components of instrumentation systems and of instrumentation practice in two very different environments the food industry and the nuclear power industry We have made the selection particularly to provide papers appropriate to the study of the Open University course T292 Instrumentation The papers have been chosen so that the book covers a wide spectrum of instrumentation techniques Because of this the book should be of value not only to students of instrumentation but also to practising engineers and scientists wishing to glean ideas from areas of instrumentation outside their own fields of expertise In recent years instrumentation has emerged as a discipline in its own right rather than as an adjunct to traditional science and engineering disciplines This development has been driven partly by the needs of industries for new and improved sensing techniques and partly by new technological developments such as microprocessors optical fibres and in integrated silicon sensors which are revolutionising sensing and signal processing practice **Instrument Engineers'**

Handbook, Volume Two Bela G. Liptak, 2018-10-08 The latest update to Bela Liptak's acclaimed bible of instrument engineering is now available Retaining the format that made the previous editions bestsellers in their own right the fourth edition of Process Control and Optimization continues the tradition of providing quick and easy access to highly practical information The authors are practicing engineers not theoretical people from academia and their from the trenches advice has been repeatedly tested in real life applications Expanded coverage includes descriptions of overseas manufacturer's products and concepts model based optimization in control theory new major inventions and innovations in control valves and a full chapter devoted to safety With more than 2000 graphs figures and tables this all inclusive encyclopedic volume replaces an entire library with one authoritative reference The fourth edition brings the content of the previous editions completely up to date incorporates the developments of the last decade and broadens the horizons of the work from an American to a global perspective Bela G Liptak speaks on Post Oil Energy Technology on the AT T Tech Channel *MAT 20 years Topic-wise Solved Papers (1997-2016) 7th Edition* Deepak Agarwal, Shipra Agarwal, 2017-08-01 MAT 20 years Topic wise Solved Papers 1997 2016 consists of detailed solutions of the past 20 years of MAT question papers distributed in 55 topics The book is divided into 5 sections MATHEMATICAL SKILLS LANGUAGE COMPREHENSION DATA ANALYSIS AND SUFFICIENCY INTELLIGENCE AND CRITICAL REASONING and INDIAN AND GLOBAL ENVIRONMENT These 5 sections are further divided into 55 chapters The book is also helpful for other exams like CMAT NMAT ATMA IRMA SNAP Bank PO Bank Clerk SSC Railways etc To summarise the book is aimed to serve as one stop solution for all major Competitive Exams

G. Milnes,2012-12-06 For some time there has been a need for a semiconductor device book that carries diode and transistor theory beyond an introductory level and yet has space to touch on a wider range of semiconductor device principles and applications Such topics are covered in specialized monographs numbering many hundreds but the voluminous nature of this literature limits access for students This book is the outcome of attempts to develop a broad course on devices and integrated electronics for university students at about senior year level The educational prerequisites are an introductory course in semiconductor junction and transistor concepts and a course on analog and digital circuits that has

introduced the concepts of rectification amplification oscillators modulation and logic and Switching circuits The book should also be of value to professional engineers and physicists because of both the information included and the detailed guide to the literature given by the references The aim has been to bring some measure of order into the subject area examined and to provide a basic structure from which teachers may develop themes that are of most interest to students and themselves Semiconductor devices and integrated circuits are reviewed and fundamental factors that control power levels frequency speed size and cost are discussed The text also briefly mentions how devices are used and presents circuits and comments on representative applications Thus the book seeks a balance between the extremes of device physics and circuit design

Remote Sensing and Atmospheric Ozone Arthur Philip Cracknell, Costas Varotsos, 2012-06-21 The destruction of the ozone layer together with global warming is one of the hot environmental topics of today This book examines the effect of human activities on atmospheric ozone namely the increase of tropospheric ozone and the general diminution of stratospheric ozone and the production of the Antarctic ozone hole Also discussed is the role of remote sensing techniques in the understanding of the effects of human activities on atmospheric ozone as well as in the development of social and political awareness of the damage to the ozone layer by man made chemicals principally CFCs This led to the formulation and ratification in 1989 of the Montreal Protocol on controlling banning the manufacture and use of chemicals that damage the ozone layer Since then remote sensing has played a key role in monitoring atmospheric ozone concentration and determining the success of the Montreal Protocol in protecting the ozone layer from further damage In this book the renowned authors discuss the sophisticated instruments that have been launched into space to study not only ozone but also other trace gases in the atmosphere some of which play a key role in the generation and destruction of ozone in the atmosphere Professors Cracknell and Varotsos also examine the satellite flown instruments which are involved in monitoring the absorption of solar ultraviolet light in the atmosphere in relation both to the generation and destruction of ozone and consequently to human health This scholarly book written by the foremost experts in the field looks at remote sensing and its employment in the various aspects of ozone science It is widely acknowledged that global warming due to anthropogenic greenhouse gases emissions represents a threat to the sustainability of human life on Earth However many other threats are potentially just as serious including atmospheric pollution ozone depletion water pollution the degradation of agricultural land deforestation the depletion of the world's mineral resources and population growth
