Note: A load shed kit or RXT combined interface/load management board is **required** for load management. See TT-1609 for the load shed kit or TP-6807, RXT Operation and Installation Manual, for load management operation information.

The power relay modules can be mounted indoors or outdoors. Mount the modules on a sturdy vertical surface with the drain holes at the bottom of the module.

Two (2) 120 VAC loads (shed simultaneously) or a single 240 VAC load can be wired to each relay.

An adequate electrical supply is required for operation of the power relay module. The 120 VAC relays require a customer-supplied voltage source. Check the electrical requirements of the customer-provided equipment prior to installation to determine the wire size and circuit protection required. Verify that customer-provided equipment complies with applicable local and national electrical codes.

Read the entire installation procedure and compare the kit parts with the parts list at the end of this publication before beginning installation. Perform the steps in the order shown.

See Figure 1 for an illustration of the power relay module.
